**INTERNATIONAL DARK-SKY ASSOCIATION APPLICATION
KEEP SEDONA BEAUTIFUL, INC.
NOVEMBER 2, 2013**

I. Introduction

Introduction

Keep Sedona Beautiful (KSB) is a tax-deductible organization based in Sedona, Arizona. For over 40 years, this community-based, volunteer organization has been working to implement the following Mission:

"Keep Sedona Beautiful, Inc., acting through the stewardship of its members and volunteers, is committed to protect and sustain the unique scenic beauty and natural environment of the Greater Sedona Area."

KSB has a long track record of leading land preservation efforts that since 1998 have added about 500 acres of privately owned parcels in the greater Sedona area to the Coconino National Forest. It has educated the public since 1979 on the importance of using native plants in landscaping by holding annual Native Plant workshops; has advocated since 1988 to obtain National Scenic Area designation for 160,000 acres in the greater Sedona area; teaches low water use landscaping and water conservation; and most relevant to this application, has promoted dark skies with a Dark-Skies Committee since 1999. The committee asked businesses and housing developments to tone down offending lighting. This activism led the City of Sedona and Yavapai County to formulate, with the help of KSB and others, strong exterior lighting codes that are dark-sky compliant as defined by the IDA.

In keeping with our Mission, we strongly believe that preserving the dark skies of Sedona is a most worthy goal that both enhances the quality of life of our fellow residents and protects our wondrous natural environment. To that end, we have prepared the following application to obtain from the International Dark-Sky Association (IDA), their designation as a Dark Sky Community (DSC).

Please note that the following application was compiled based on the IDA Dark Sky Community Criteria dated May 2013.

III. Nomination Letter

November 2, 2013

Dr. John Barentine
Program Manager
International Dark-Sky Association
3223 N. First Avenue
Tucson, AZ 85719

Dear Dr. Barentine:

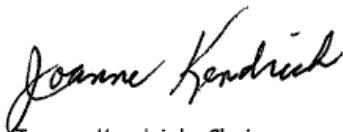

As a member of the International Dark-Sky Association (IDA), and as Chair of the Keep Sedona Beautiful Dark-Sky Committee, I am honored to write this supporting letter for the nomination of the City of Sedona for the Dark-Sky Community designation.

Sedona has been concerned with the issue of responsible outdoor light for many years. The City of Sedona passed a stringent outdoor lighting ordinance in 2001. This outdoor lighting ordinance meets and exceeds the requirements of the IDA. By passing this outdoor lighting ordinance, the community showed support and dedication to the preservation of the night sky. Preserving the dark sky is part of the City of Sedona 2002 10-year Community Plan. One of the priorities listed in the New (2013) Community Plan for the City of Sedona, which will be submitted to the voters in 2014, is to "support community efforts to be dark-sky compliant".

Keep Sedona Beautiful has received broad community support for the Dark-Sky Community designation for Sedona. We are hopeful that the City of Sedona will be recognized for its efforts to preserve one of its natural resources, the dark sky, and be awarded the International Dark-Sky Community designation.

Thank you for your consideration of this application.

Sincerely,

A handwritten signature in black ink that reads "Joanne Kendrick". The signature is written in a cursive, flowing style.

Joanne Kendrick, Chair
Keep Sedona Beautiful Dark-Sky Committee
International Dark-Sky Association Member

102 Roadrunner Drive
Sedona, Arizona 86336
www.SedonaAZ.gov

November 4, 2013

Dr. John Barentine
Program Manager
International Dark Sky Association
3223 N. First Ave.
Tucson, AZ 85710

Please accept this letter as my personal support, as Mayor of Sedona, for the International Dark Sky designation for the City of Sedona.

Sedona is known world-wide for its spectacular natural environment. It is stated in our City Vision Statement that we are committed to be "stewards of one of earth's great treasures". It is my personal goal to take a leadership role in establishing Sedona as a model city in sustainability and environmental stewardship. Preserving our dark skies is just one component of this goal.

Sedona has been proactive in implementing various programs, incentives and education opportunities that are targeted at dark sky enhancement and preservation. These programs are outlined in the application that you have received. We are proud to partner with the organization, Keep Sedona Beautiful, in the application for the International Dark Sky City designation. It is through these types of partnerships and collaborations that Sedona has been able to achieve a Bicycle Friendly City designation, the development of a solar array that provides a majority of electrical power to our school district, the creation of constructed wetlands to upgrade and filtrate our wastewater effluent and other sustainable projects.

I thank you for your consideration of the application. Please know that I sincerely appreciate the efforts of the IDA to preserve dark skies throughout our country. I was born and raised on a ranch in New Mexico. I remember the wonderment, as a child, of gazing at the stars and planets on a crystal clear night. Future generations should have the same opportunity.

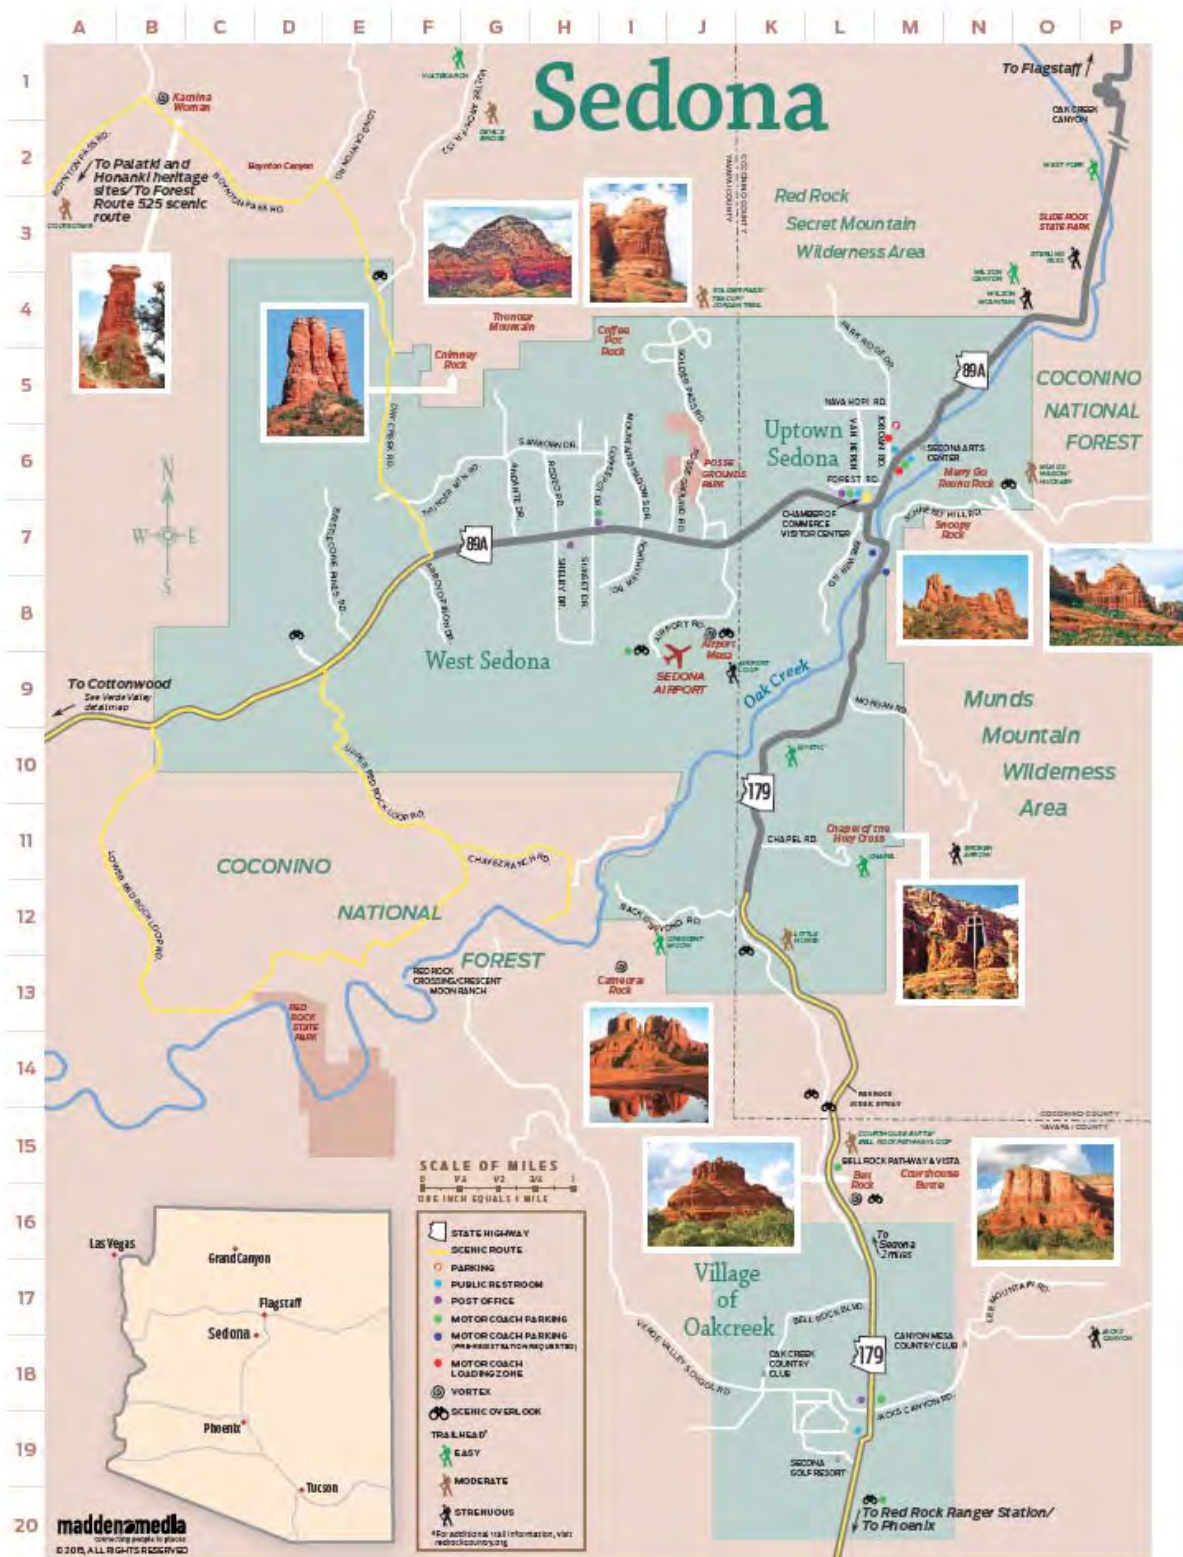

Sincerely,

Rob Adams, Mayor
City of Sedona

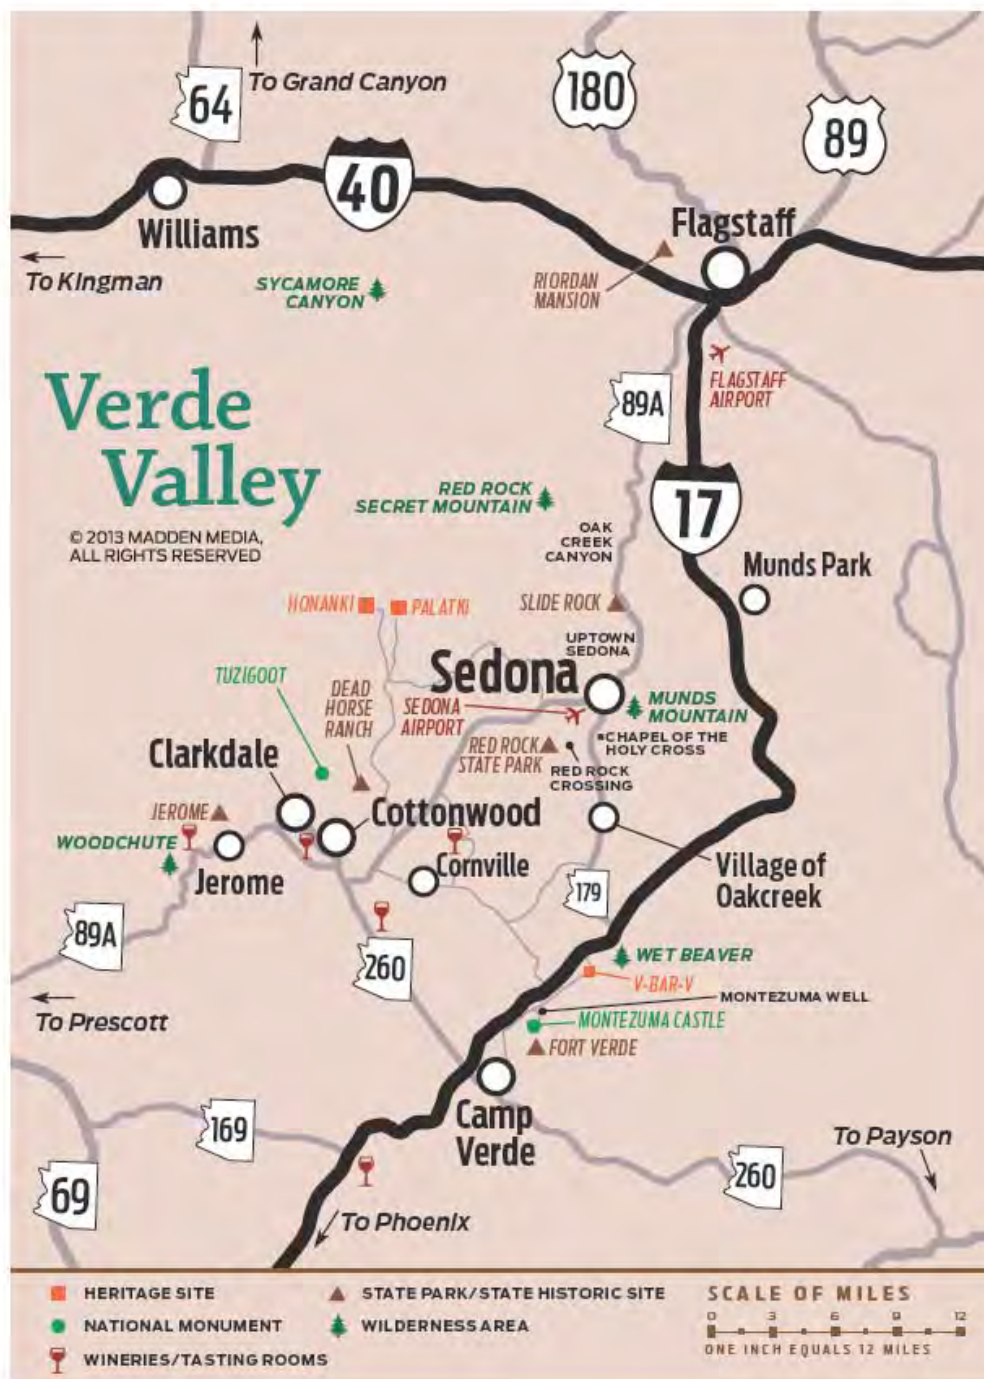

IV. Sedona Demographics

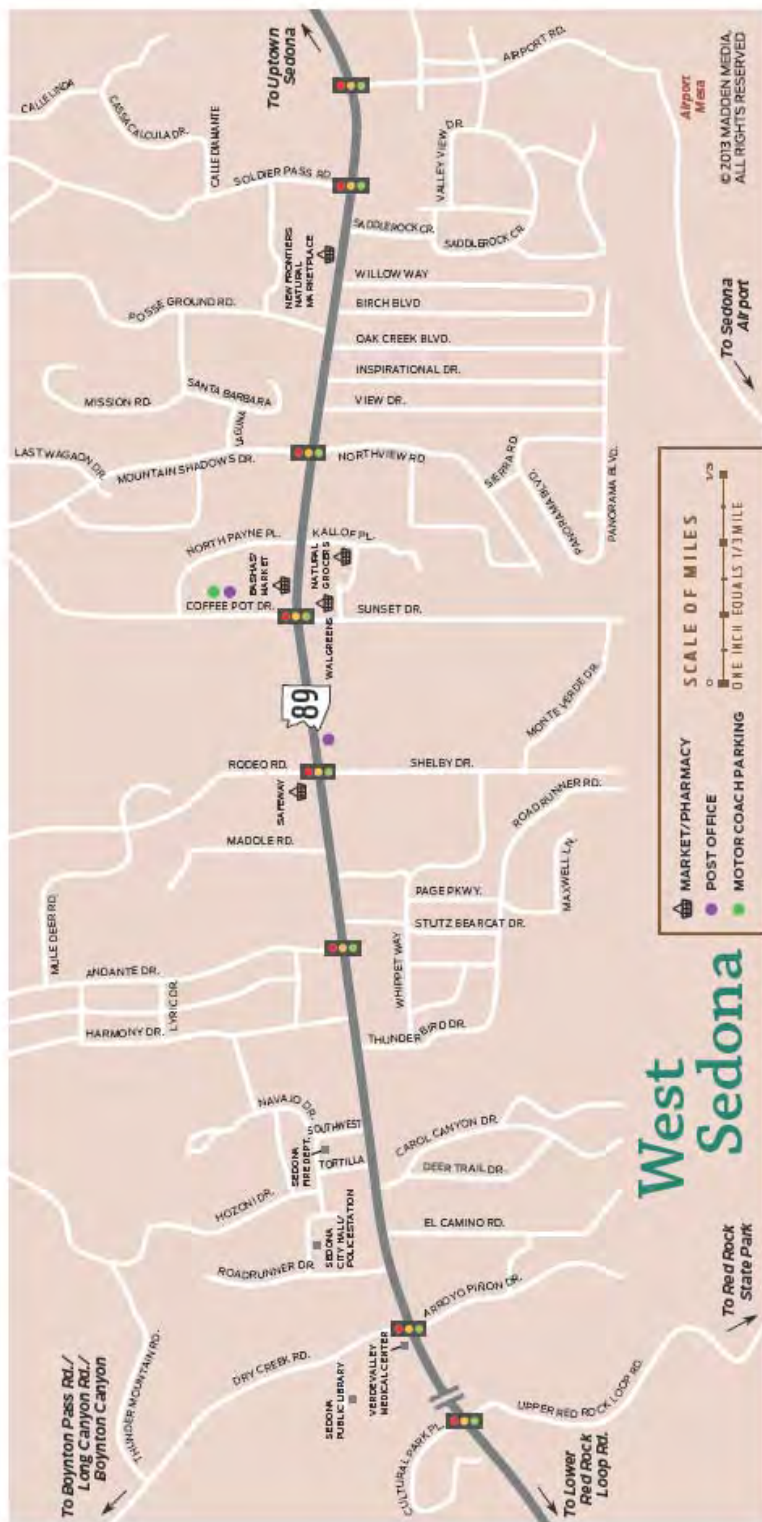

a. Sedona, AZ Map

Please see below and **Appendix 1**

Content:**b. Sedona Factual Information****Demographics**

- Population in 2012: 10,037 (66% urban, 34% rural)
- Population change since 2000: -1.5%
- Males: 4,690 (46.7%)
- Females: 5,347 (53.3%)
- Median resident age: 56.1 years
- Arizona median age: 37.1 years

- Zip codes: 86336, 86339, 86340, 86341, 86351.

- Estimated median household income in 2011: \$47,396
- Median household income in 2000: \$44,042
- Median household income in Sedona in 2011: \$47,396
- Median household income in Arizona in 2011: \$46,709
- Estimated per capita income in 2011: \$48,592

- Estimated median house or condo value in 2011: \$374,369
- Estimated median house or condo value in 2000: \$221,000
- Estimated median house or condo value in Sedona in 2011: \$374,369
- Estimated median house or condo value in Arizona in 2011: \$153,800
- Mean prices in 2011:
 - All housing units: \$604,117
 - Detached houses: \$721,949
 - Townhouses or other attached units: \$400,037
 - In 2-unit structures: \$662,743
 - In 3-to-4-unit structures: \$299,270
 - In 5-or-more-unit structures: \$388,326
 - Mobile homes: \$172,531
 - Occupied boats, RVs, vans, etc.: \$21,338

- Colleges/universities with over 2000 students nearest to Sedona:
 - Northern Arizona University (about 24 miles; Flagstaff, AZ; Full-time enrollment: 17,288)
 - Universal Technical Institute-Motorcycle Mechanics (about 84 miles;

- Paradise Valley Community College (about 85 miles; Phoenix, AZ; Full-time enrollment: 3,040)
 - Midwestern University (about 86 miles; Glendale, AZ; Full-time enrollment: 2,044)
 - Everest College-Phoenix (about 91 miles; Phoenix, AZ; Full-time enrollment: 4,060)
 - Western International University (about 92 miles; Phoenix, AZ; Full-time enrollment: 2,927)
 - Argosy University-Phoenix Online Division (about 92 miles; Phoenix, AZ; Full-time enrollment: 4,792)
- Private high school in Sedona:
- Verde Valley School (Students: 108; Location: 3511 Verde Valley School Road; Grades: 9 - 12)
- Public elementary/middle schools in Sedona:
- Sedona Red Rock High School (Students: 507; Location: 995 Upper Red Rock Loop Road)
 - West Sedona Elementary School (Students: 424; Location: 570 Posse Ground Road)
 - Big Park Community School (Students: 383; Location: 25 West Saddlehorn Drive)
 - Sedona Charter School (Students: 158; Location: 165 Kachine Drive)
- Three Elementary Schools Located in Sedona:
- Big Park Community School 25 West Saddlehorn Drive, Sedona, AZ 86351
 - Sedona Charter School 165 Kachina Drive, Sedona, AZ 86336
 - West Sedona Elementary School 570 Posse Ground Road, Sedona, AZ 86336
- Two High Schools Located in Sedona:
- Pace Preparatory Academy School 75 Enchanted Way, Sedona, AZ 86336
 - Sedona Red Rock High School 995 Upper Red Rock Loop Road, Sedona, AZ 86336

V. City of Sedona Lighting Code

IDA Requirement:

- A) A quality comprehensive lighting code like the IDA/IES Model Lighting Ordinance (MLO) with the following minimum standards (more on developing a lighting code and guidelines may be found on our website <http://www.darksky.org/outdoorlighting/mlo>):**
- i) Fully-shielded or full-cutoff standard for all lighting fixtures over 3000 lumens initial lamp output (or equivalent wattages), AND;**
 - ii) Restrictions on total amount of unshielded lighting, such as a limit on lumens per acre or total site lumens in unshielded fixtures (or equivalent wattages), AND;**
 - iii) A policy to address over-lighting, such as energy density caps, lumens/acre caps, or maximum illuminance specifications:**

Sedona:

Background on the City Lighting Code

Stimulated by the dark-sky activism of many citizens and especially of KSB during 1999, City Council directed staff to re-evaluate and revise the City's outdoor lighting ordinance. Starting in September 2000, city staff commenced working with Keep Sedona Beautiful, the business community, and local citizens to identify problem areas, issues and possible solutions to be incorporated into a revised code.

This process identified that the most common issues of concern were sky glow, glare, light trespass and energy waste. It was recognized that these problems could have a negative impact on public health, safety and welfare. It was also recognized that quality lighting, proper shielding, limiting the amount of light on a site, and public education were key elements in addressing these concerns and in preserving the dark skies.

As part of this review, the City wished to specifically address the issue of dark skies and approached the International Dark Skies Association for advice. Utilizing ideas from IDA, the City of Flagstaff and Coconino County, the City prepared a new lighting ordinance.

This new ordinance utilized the "lumens per acre cap" concept, separated lighting into classes, recommended low pressure sodium lighting as a preferred lighting source and regulated lighting fixture shielding.

In 2001, this ordinance was presented to Council and received unanimous approval. As noted in Section E (i) below, the City has been successful in incorporating these requirements into new and renovations building projects.

Sedona:

Content:

a. City of Sedona Outdoor Lighting Ordinance

Sedona City Land Development Code – sections on lighting

911 Outdoor lighting.

911.01 Purpose and Intent. It is the purpose and intent of this Code to balance the goals of the Sedona Community Plan to maintain its small-town character with the need to provide for safe lighting practices and to minimize light pollution for the enjoyment of Sedona's citizens and visitors.

A. The use of outdoor lighting is often necessary for adequate nighttime safety and utility, but common lighting practices can also interfere with other legitimate public concerns. Principles among these concerns are:

1. The degradation of the nighttime visual environment by production of unsightly and dangerous glare;
2. Lighting practices that interfere with the health and safety of Sedona's citizens and visitors;
3. Unnecessary waste of energy and resources in the production of too much light or wasted light;
4. Interference in the use or enjoyment of property which is not intended to be illuminated at night, and the loss of the scenic view of the night sky due to increased urban sky-glow.

B. The concerns of safety, utility and aesthetic appearance need not compete. Good modern lighting practices can provide adequate light for safety and utility without excessive glare or light pollution. In nearly all cases, careful attention to when, where and how much nighttime lighting is needed will lead to better lighting practices.

C. The topography and atmospheric conditions in northern Arizona are uniquely suited for government, military, commercial, and private astronomical observation in the area. Unnecessary or excessive uses of outdoor nighttime lighting have an adverse impact on astronomical observation even at relatively distant observatories.

D. Accordingly, it is the intent of this Code to require lighting practices and systems which will minimize light pollution, glare, light trespass, and conserve energy while maintaining nighttime safety, utility, security and productivity.

911.02 Conflict Regulations. Where any provision of federal, state, county, or city statutes, codes, or laws conflicts with any provision of this Code, the most restrictive shall govern unless otherwise regulated by law.

911.03 Definitions. See Article [2](#) SLDC for definitions pertaining to outdoor lighting.

911.04 Applicability.

A. New Uses, Buildings and Major Additions or Modifications. If the total cumulative increase in floor area is greater than 50% for single-family residential or greater than 25% for all other uses, or if the total cumulative cost of any exterior modification, alteration or repair is greater than 25% of the valuation of the building as determined by the Director, then all outdoor lighting fixtures shall meet the requirements of this Code for the entire site, including previously installed and any new outdoor lighting. Cumulative modification or replacement of outdoor lighting constituting 25% or more of the permitted lumens for the parcel, no matter the actual amount of lighting already on a nonconforming site, shall constitute a major addition for purposes of this section.

B. Minor Additions. If the total cumulative increase in the floor area is 50% or less for single-family residential or 25% for all other uses, or if the total cumulative cost of any exterior modification, alteration or repair is less than 25% of the valuation of the building as determined by the Director, then full conformance of the existing portion of the building or structure is not required. However, such projects shall require the submission of a complete inventory and Site Plan detailing all existing and any proposed new outdoor lighting.

C. New Lighting. Any new lighting on the site shall meet the requirements of this Code with regard to shielding and lamp type; the total outdoor light output after the modifications are complete shall not exceed that on the site before the modification, or that permitted by this Code, whichever is larger.

D. Resumption of Use after Abandonment. If a property or use with nonconforming lighting is abandoned as defined in Article [12](#) SLDC, Nonconforming Situations, then all outdoor lighting shall be reviewed and brought into compliance with this Code before the use is resumed.

E. Public Roadways. In general this Code does not apply to city and state rights-of-way. However, all such street lights must be fully shielded.

911.05 Outdoor Lighting Standards.

A. Low Pressure Sodium Lighting. Due to their high energy efficiency, long life and spectral characteristics, low pressure sodium (LPS) lamps are the preferred illumination source throughout the city. Their use is to be encouraged, when not required, for outdoor illumination whenever its

use would not be detrimental to the use of the property. Ten percent white light added to LPS light permits nearly normal color perception.

1. Class 1 Lighting. Low pressure sodium (LPS) lamps are not required. Businesses who chose to use LPS as their primary lamps are eligible to apply for an additional 10% increase in the lumens per acre allowed for their site.

2. Class 2 Lighting. Low pressure sodium (LPS) lamps are required. Up to 10% of the total lumens per acre allowed may be white light.

B. Light Trespass Standard. All light fixtures, including security lighting, shall be aimed and shielded so that the direct illumination shall be confined to the property boundaries of the source. Particular care is to be taken to assure that the direct illumination does not fall onto or across any public or private street or road. Motion sensing light fixtures shall be fully shielded and properly adjusted, according to the manufacturer's instructions, to turn off when detected motion ceases.

C. Lamp and Shielding. All light fixtures are required to be fully shielded and shall be installed in such a manner that the shielding complies with the definition of fully shielded light fixtures for all uses, including single-family and multifamily residential uses, except as provided below.

1. All lamp types above 2,000 lumens shall be fully shielded.

2. Partially shielded light fixtures may be permitted subject to the approval of the Director. Partially shielded light fixtures are limited to a maximum of 5,500 lumens per net acre and shall not exceed 2,000 per lamp (see subsection [911.05\(D\)](#) of this section).

D. Total Outdoor Light Output Standards – Nonresidential and Multifamily Uses.

1. Total outdoor light output shall not exceed 100,000 lumens per net acre for all development except single-family residential uses. This cap is not intended to be achieved in all cases or as a design goal. Instead, design goals should be the lowest levels of lumens necessary to meet the lighting requirements of the site. Partially shielded light fixtures are limited to a maximum of 5,500 lumens per net acre and are counted towards the 100,000 lumens per net acre cap.

2. Seasonal decorations, permitted between Thanksgiving and January 15, are not counted toward these limits. Lighting used for external illumination of signs is counted.

E. Total Outdoor Light Output Standards – Single-Family Residential Uses.

1. Outdoor lighting for single-family residential uses is not subject to a lumens per net acre cap.

2. Outdoor lighting for single-family residential uses is subject to the lamp fixture and shielding requirements.

F. Parking Lot Standards. Parking lots shall be considered Class 2 lighting. Parking lot lighting poles shall be sized in such a manner that the top of any luminary does not exceed 12 feet above adjacent grade.

G. Lighting Time Limitations.

1. Class 1 lighting, including but not limited to sales, service, commercial, assembly, repair, maintenance, and industrial areas, may only continue in operation until 11:00 p.m. or for as long as the area is in active use but once off remain off during nonbusiness hours.
2. Class 2 lighting shall have no time restrictions except as specified by any conditions of approval. Uses that do not require all-night illumination are encouraged to turn off their outdoor lighting during night hours whenever possible.
3. Class 3 lighting, except for flagpole lighting, must be extinguished after 11:00 p.m. or when the business closes, whichever is later, except that low-wattage holiday decorations may remain on all night from Thanksgiving to January 15.
4. Multi-class lighting, except for security lighting, must conform to the time limitations of the strictest class.

H. Multi-Class Lighting Standard. Multi-class lighting must conform to the shielding and timing restrictions, if any, that apply to the most restrictive included class.

I. Class 3 Lighting Standards.

1. All Class 3 lighting must be selected, designed, installed, and aimed so that there is a minimum amount of spill beyond the area intended to be lighted.
2. Permanent exposed string lighting is not permitted.
3. All Class 3 lighting must comply with the light trespass standards as described in subsection [911.05\(B\)](#) of this section.
4. All Class 3 lighting shall comply with the lamp and shielding standards as described in subsection [911.05\(C\)](#) of this section.
5. a. Subject to the approval of the Director, uplighting or ground-mounted lighting may be allowed to accent unique features of a building and/or surrounding landscaping (such as outstanding architectural features, specimen trees with dense year-round foliage or large native shrub masses). Uplighting or ground-mounted lighting shall be designed and installed

in such a manner as to minimize glare with special consideration in areas where there is vehicle and pedestrian traffic.

b. All lighting which is directed upwards shall be placed in such a manner that the angle of the lamp shall not be greater than 45 degrees measured from a horizontal plane to a line projected through the center of the lamp, and fixtures shall be fully shielded to contain and direct the light onto the feature to be lighted.

J. Signs. See Article [11](#) SLDC, Sign Regulations.

K. Mercury vapor light bulbs and fixtures in use for outdoor lighting on the effective date of the ordinance codified in this Code shall not be used after July 1, 2006.

L. Searchlights, floodlights, laser source lights, strobe or flashing lights, illusion lights or any similar high intensity light shall not be permitted except in emergencies by police and fire personnel at their direction. Spot lights are permitted and must be directed downward 45 degrees from any neighboring property.

M. On projects where an engineer or architect is required, the developer shall verify in writing to the city that all outdoor lighting was installed in accordance with the approved plans.

911.06 Special Uses.

A. Recreational Facilities.

1. Lighting for outdoor athletic fields, courts or tracks shall be considered Class 1.
2. Lighting allowed in this subsection shall be subject to approval. When the proposed lumens per acre exceed the lumens per net acre limits, the installation shall be designed to achieve no greater than the minimum illuminance levels for the activity as recommended by the Illuminating Engineering Society of North America (IESNA).
3. Every such lighting system design shall be certified by an Arizona registered engineer as conforming to all applicable restrictions of this Code.
4. Such lighting shall not include any light trespass as determined by the Director.
5. All events shall be scheduled so as to complete all activity and lights turned off by 10:00 p.m.
6. Fully shielded lighting shall be required for fields designed for amateur, recreational or nonprofessional sports activity. For professional level sports facilities where fully shielded fixtures are not utilized, acceptable luminaries shall include those which:

- a. Are provided with internal or external glare control louvers, or both, and installed so as to minimize uplight and off-site light trespass as determined by the Director; and
- b. Are installed and maintained with aiming angles that permit no greater than 2% of the light emitted by each fixture to project above the horizontal.

B. Outdoor Display Lots. Light for outdoor display lots shall be considered Class 1, and shall conform to the lumens per net acre limits except as follows:

1. All such lighting shall utilize fully shielded luminaries that are installed in a fashion that maintains the fully shielded characteristics.
2. When the proposed lumens exceed the per acre limits, the installation shall be designed to achieve no greater than the minimum illuminance levels for the activity as recommended by the Illuminating Engineering Society of North America (IESNA).
3. Such lighting shall not include any light trespass as determined by the Director.
4. Every such lighting system design shall be certified by an Arizona registered engineer as conforming to all applicable restrictions of this Code.
5. Lighting Time Limitations. Outdoor display lot lighting shall conform to the hours of operation as established under Class 1 lighting standards. Any lighting on after the time limitations shall be considered Class 2 lighting and shall conform to all restrictions of this Code applicable to this class.

C. Service Station Canopies.

1. Class 2. Lighting for service station canopies shall be considered Class 2 lighting.
2. Shielding. All luminaries shall be flush with the lower surface of canopies and utilize flat glass or plastic covers.
3. Total Under-Canopy Output. The total light output used for illuminating service station canopies, defined as the sum of under-canopy initial bare-lamp outputs in lumens, shall not exceed 40 lumens per square foot of canopy. All lighting mounted under the canopy, except internally illuminated signs, shall be included in the total. Fifty percent of the total lumen output of all lamps mounted within or under a canopy shall be included in the lumen per acre cap.

D. Other Lighting on Parcels with Special Uses. All site lighting not directly associated with the special uses as permitted shall conform to all lighting standards described in this Code.

911.07 Plan Submittal and Evidence of Compliance.

A. Plan Submittal. Whenever a person is required to obtain a permit for outdoor lighting or signage, a conditional use permit, subdivision approval or any development plan approved by the city, including all city projects, or whenever a person requests a rezoning, the applicant shall, as part of the application process, submit sufficient information to enable the Director to determine whether proposed lighting complies with this Code. All applications may be subject to review and action by the Planning and Zoning Commission at the discretion of the Director.

B. Applications. All applications shall include the following:

1. A Site Plan indicating the location of all lighting fixtures, both proposed and any already existing on the site.
2. A description of each illuminating device, fixture, lamp, support and shield, both proposed and existing. The description shall include, but is not limited to, manufacturer's catalog cuts and illustrations (including sections where required); lamp types, wattages and initial lumen outputs.
3. Such other information that the Director may determine is necessary to ensure compliance with this Code.

C. Plan Approval. If the Director determines that any proposed lighting does not comply with this Code, the permit shall not be issued or the plan approved.

D. Lamp or Fixture Substitution. Should any outdoor light fixture or the type of light source therein be changed after the permit has been issued, a change request must be submitted to the Director for approval, together with adequate information to assure compliance with this Code, which must be received prior to substitution.

E. Certification of Installation. For all projects where the total initial output of the proposed lighting equals or exceeds 100,000 lamp lumens, certification that the lighting, as installed, conforms to the approved plans shall be provided by a certified engineer before the Certificate of Occupancy is issued. Until this certification is submitted, approval for use of a Certificate of Occupancy shall not be issued for the project.

911.08 Approved Materials and Methods of Construction or Installation/Operation – Approval of Alternatives. The provisions of this Code are not intended to prevent the use of any design, material, or method of installation or operation not specifically prescribed by this Code, provided any such alternate has been approved by the Director. The Director may approve any such proposed alternate providing that it:

- A. Provides at least approximate equivalence to that applicable specific requirement of this Code.
- B. Is otherwise satisfactory and complies with the intent of this Code.

911.09 Exemptions and Nonconforming Lights.

A. All nonconforming outdoor light fixtures lawfully installed prior to and operable on the effective date of the ordinance codified in this Code are exempt from all requirements of this Code. However, there shall be no change in use or lamp type, or any replacement (except for same-type and same-output lamp replacement) or structural alteration made, without conforming to all applicable requirements of this Code.

B. In the event that an outdoor lighting fixture is abandoned or is damaged to the point of requiring repairs for safe operation, the repaired or replacement fixture shall comply with the provisions of this Code.

C. Emergency lighting, used by police, firefighting, or medical personnel, or at their direction, is exempt from all requirements of this Code for as long as the emergency exists.

D. Swimming Pool and Decorative Water Fountain Lighting. Underwater lighting used for the illumination of swimming pools and decorative water fountains is exempt from the lamp type and shielding standards, though they must conform to all other provisions of this Code.

[Ord. 2006-02, 1-10-2006; Ord. 2009-15, 10-13-2009].

Article 11
SIGN REGULATIONS

1106 General standards for signs.

G. Lighting Requirements.

1. Externally lit signs shall be illuminated only with steady, stationary, shielded light sources directed solely onto the sign without causing glare.
2. Light bulbs or lighting tubes used for illuminating a sign shall not be visible from adjacent public rights-of-way or residential properties.
3. External illumination for signs shall conform to all provisions of SLDC [911](#), Outdoor lighting. Such lighting shall be treated as Class 1 lighting and shall conform to the lamp and shielding restrictions and lumen caps.
4. The intensity of sign lighting shall not exceed that necessary to illuminate and make legible a sign from the adjacent travel way or closest right-of-way; and the illumination of a sign shall not be obtrusive to the surrounding area as determined by the Director.

5. The fixtures used to illuminate signs shall not be directed toward nearby residential properties.

6. Internally illuminated signs are permitted in certain circumstances as follows:

- a. Individual back-lit letters which are silhouetted against a softly illuminated wall (see Illustration 11-1);

Illustration 11-1

- b. Individual letters with translucent faces, containing soft lighting elements inside each letter (see Illustration 11-2); and

Illustration 11-2

- c. Metal-faced box signs with cut-out letters and soft-glow fluorescent tubes (see Illustration 11-3).

Illustration 11-3

7. Fluorescent lights shall be allowed for indirect illumination when placed in such a manner that the light tubes are not exposed to view from the public right-of-way or sidewalk.

8. A sign may be illuminated during the hours of operation of the facility being identified or advertised or until 11:00 p.m., whichever is later.
9. Such signs shall provide an automatic timer to comply with the intent of this section.
10. Illumination of off-premises signs is prohibited, except in the case of off-premises kiosks which are subject to the provisions of this Code.
11. a. Ground-mounted sign lighting is not permitted for freestanding signs on poles, where open space is visible from the bottom of the sign to the ground. The Director may approve ground-mounted lighting for freestanding signs which are constructed in such a way that no open space is visible from the bottom of sign to the ground (such as solid base, landscaping).
- b. All ground-mounted lights shall be placed in such a manner that the angle of the lamp shall not be greater than 45 degrees measured from a horizontal plane to a line projected through the center of the lamp, and fixtures shall be fully shielded to contain and direct the light onto the sign only. All upward-directed sign lighting is prohibited. Existing nonconforming bottom- or side-mounted outdoor sign lighting shall not be used after July 1, 2006.
-

Outdoor Lighting. This definition includes the following terms and definitions:

- A. **"Class 1 lighting"** means all outdoor lighting used for, but not limited to, outdoor sales or eating areas, assembly or repair areas, advertising and other signs, recreational facilities and other similar applications where color rendition is important to preserve the effectiveness of the activity.
- B. **"Class 2 lighting"** means all outdoor lighting used for, but not limited to, illumination for walkways, roadways, equipment yards, parking lots and outdoor security where general illumination for safety or security of the grounds is the primary concern.
- C. **"Class 3 lighting"** means any outdoor lighting used for decorative effects including, but not limited to, architectural illumination, flag and monument lighting, and illumination of trees, bushes, and the like.
- D. **"Direct illumination"** means illumination resulting from light emitted directly from a lamp, luminary, or reflector and is not light diffused through translucent signs or reflected from other surfaces such as the ground or building faces.

E. **"Display lot or area"** means outdoor areas where active nighttime sales activity occurs and where accurate color perception of merchandise by customers is required. To qualify as a display lot, 1 of the following specific uses must occur: automobile sales, boat sales, tractor sales, building supply sales, gardening or nursery sales, and assembly lots. Uses not on this list may be approved as display lot uses by the Director.

F. **"Foot-candle"** means 1 lumen per square foot. Unit of illuminance. It is the luminous flux per unit area in the Imperial system. One foot-candle equals approximately 0.1 (0.093) lux.

G. **"Fully shielded light fixture"** means a light fixture that is shielded in such a manner that light rays emitted by the fixture, either directly from the lamp or indirectly from the fixture, are projected below a horizontal plane running through the lowest point on the fixture where light is emitted (see Figure 2.9).

Figure 2.9 Example of Fully Shielded Light Fixture (Shoe Box)

H. **"Glare"** means the sensation produced by a bright source within the visual field that is sufficiently brighter than the level to which the eyes are adapted to cause annoyance, discomfort, or loss in visual performance and visibility; blinding light. The magnitude of glare depends on such factors as the size, position, brightness of the source, and on the brightness level to which the eyes are adapted.

I. **"Installed"** means a light fixture attached or fixed in place, whether or not connected to a power source, of any outdoor light fixture.

J. **"Light pollution"** means any adverse effect of manmade light.

K. **"Light trespass"** means light spill falling over property lines that illuminates adjacent grounds or buildings in an objectionable manner.

L. **"Lumen"** means a unit used to measure the actual amount of visible light which is produced by a lamp as specified by the manufacturer.

M. **"Luminary"** means the complete lighting assembly, less the support assembly.

N. **"Motion sensing security lighting"** means any fixture designed, and properly adjusted, to illuminate an area around a residence or other building by means of switching on a lamp when motion is detected inside the area or perimeter, and switching the lamp off when the detected motion ceases.

O. **"Multi-class lighting"** means any outdoor lighting used for more than 1 purpose, such as security and decoration, such that its use falls under the definition of 2 or more classes as defined for Class 1, 2 and 3 lighting.

P. **"Net acreage"** means the remaining ground area of a parcel after deleting all portions for proposed and existing public rights-of-way and undeveloped area.

Q. **"Outdoor light fixture"** means an outdoor illuminating device, outdoor lighting or reflective surface, lamp or similar device, permanently installed or portable, used for illumination, decoration, or advertisement. Such devices shall include, but are not limited to, lights used for:

1. Buildings and structures;
2. Recreational areas;
3. Parking lot lighting;
4. Landscape lighting;
5. Architectural lighting;
6. Signs (advertising or other);
7. Street lighting;
8. Product display area lighting;
9. Building overhangs and open canopies;
10. Security lighting.

R. **"Outdoor recreation facility"** means an area designed for active recreation, whether publicly or privately owned, including, but not limited to, parks, baseball diamonds, soccer and football fields, golf courses, tennis courts, and swimming pools.

S. **"Partially shielded light fixture"** means a fixture shielded in such a manner that no more than 10% of the light emitted directly from the lamp or indirectly from the fixture is projected at an angle above the horizontal, as determined by photometric test or certified by the manufacturer. Luminaries mounted under canopies or other structures such that the surrounding structure effectively shields the light in the same manner are also considered partially shielded for the purposes of this Code.

T. **"Security lighting"** means lighting designed to illuminate a property or grounds for the purpose of visual security. This includes fully shielded lighting designed.

U. **"Unshielded fixture"** means any fixture that allows light to be emitted above the horizontal directly from the lamp or indirectly from the fixture or a reflector.

V. **"Watt"** means the unit used to measure the electrical power consumption (not the light output) of a lamp.

b. Email from Amee Hennig, IDA Project Manager, dated May 28, 2013

On May 28, 2013, at 10:19 AM, Amee wrote:
Hi Joanne,

Thank you for checking up.

On a side note we do have the new IDSC guidelines ready to release for you. I am hoping that they should go out today. I'll make sure a copy is sent to you.

Please see my answers below to your questions.

About the lighting ordinance

After checking on this it looks like the lighting ordinance is the same as what we received in November. Is this correct? Have there been any other changes?

If it is the same then Scott took a look at it and his comments were:

I would say that Sedona's outdoor lighting ordinance certainly meets the requirements for our International Dark Sky Communities (IDSC) program. I was also pleased to see the documents related to your matching grant program for lighting retrofits. It is a great example of the kind of things that communities can do to make a difference. Hopefully you have had a lot of response to the program.

Both the lighting ordinance and the retrofit program can serve as important elements in an IDSC application.

Great job.
Clear skies,
Amee

VI. City-Owned Lighting Confirming with the Light Code

IDA Requirement:

B) Community commitment to dark skies and quality lighting as shown by:

- i) **City-owned lighting conforming with, or committed to conforming with, the lighting code (if the latter, a published plan with a timeline for completion in no more than 5 years).**

Sedona:

For clarity of presentation, we have divided the City's compliance program into the following sections.

Content:

- a. City Hall
- b. Posse Grounds Lighting Project
- c. Uptown Enhancement Project
- d. State Route 179 Widening Project
- e. State Route 89A Roadway Lighting Project
- f. Remainder of City-Owned Outdoor Lighting

Content:

a. City Hall

As part of its dark skies compliance program, the City has embarked on the following:

As part of the fiscal year 2012/2013 budget, Sedona City Council approved funds to begin retrofitting all City Hall lighting fixtures with energy efficient, dark sky compliant lighting. Sedona City Hall has a total of 133 outdoor lighting fixtures. From July 1, 2012 through June 30, 2013, 90 fixtures and/or bulbs were retrofitted to meet the City of Sedona's dark sky outdoor lighting ordinance.

As part of the fiscal year 2013/2014 budget, Sedona City Council again approved funds to retrofit the remaining outdoor lighting fixtures to bring Sedona City Hall into complete compliance with the City of Sedona's dark sky outdoor lighting ordinance. Sedona's facility maintenance staff will have the remaining outdoor fixtures and bulbs replaced by December 2013.

The following table summarizes all outdoor lighting fixtures located at Sedona City Hall. This chart indicates the total cost to retrofit all outdoor lighting fixtures, the total overall anticipated energy reduction, the total overall lumens count, and those outstanding fixtures that are scheduled for replacement between July 2013 and October 2013.

Type of Fixture	#	Old Wattage	New Wattage	Cost (ea)	Total	Lumens (ea)	Total Lumens	# still to be installed
Bollard	26	70	30	\$672.25	\$17,478.50	1500	39000	3
Wall pack (20 watt)	21	22	20	\$161.25	\$3,386.25	1323	27783	0
Wall pack (10 watt)	5	22	10	\$142.00	\$710.00	719	3595	0
Step lighting	37	9	5	\$133.53	\$4,940.61	128	4736	22
Covered Parking bulbs	24	40	28	\$13.50	\$324.00	2562	61488	12
Recessed lighting	14	15	9	\$38.48	\$538.72	620	8680	0
PD Wall packs	1	90	40	\$357.06	\$357.06	3200	3200	1
PD other lighting	1	90	40	\$318.79	\$318.79	3200	3200	1
Other Parking lighting	4	250	100	\$126.40	\$505.60	8000	32000	4
	133						183682	43

Total Cost: **\$28,559.53**
Energy Use Reduction: **46.5%**

City Manager's Office

Memo

Date: November 14, 2013
To: Joanne Kendrick
From: Nicholas R. Gioello
Assistant to the City Manager
Subject: Retrofit of City Hall complex exterior lighting fixtures

The retrofit of all City Hall complex exterior lighting fixtures to fully-shielded dark sky compliant fixtures is now complete; all exterior light fixtures are fully shielded. City staff is currently in the process of replacing the four 250 watt high-pressure sodium parking lot lights with 100-watt induction lighting elements. This process will be 100% complete by the end of December 2013.

WHAT'S DIFFERENT ABOUT THE LIGHTING AT CITY HALL?

Lots! David DeMerritt, City of Sedona Facilities Supervisor, has been up on his ladder changing out every fixture with lower cost, longer lasting lights.

From the bollards to the wall lights, from the step lights to the recessed lights, LED lighting was selected for these applications due to its longevity and quality of light. LED bulbs are almost maintenance free and it will be 10 years before David will need to change them out. They lower the City's electrical costs and improve night-time safety.

For example, the cost to operate one bollard in the courtyard went from 14 cents per day or \$51 per year to 6 cents per day or \$22 per year.

Before the change-out, the cost to operate exterior lights was \$9.70 per day or \$3,540 per year. After the change-out, the cost dropped to \$5.13 per day or \$1,872 per year.

The parking lot poles and the Police Department garage were both retrofitted with induction lighting. Induction lighting is essentially fluorescent lighting without the filament. Gas in the tube is energized by a high-frequency magnetic field. Because they don't use the filament to energize the gas they can be expected to last more than 60,000 hours. The fixtures under the parking canopy remained as fluorescent tubes but were upgraded with electronic ballasts and lower wattage bulbs. Every fixture installed uses less energy than the one it replaced.

After David completed his research, ordered the bulbs and converted all of the fixtures, we asked him what his favorite part of the project was. He replied, "Turning on the lights and having every fixture work at the same time."

**SEDONA CITY HALL
LIGHT CHANGES:**

TYPE	#	OLD WATTS	NEW WATTS	OLD TOTAL	NEW TOTAL	LUMENS (EA)	TOTAL LUMENS
BOLLARD	28	70	30	1960	840	1500	42000
WALL	26	22	20	572	520	1323	34398
STEP	37	9	5	333	185	128	4736
PARKING POLE	4	250	100	1000	400	8000	32000
TOTAL				3865	1945		113134

SEDONA CITY HALL LIGHT CHANGES:

Below are some before and after pictures for the Wall, Step, and Bollard lights. The Parking Pole fixture remains the same, just retrofitting the bulb from a 250-watt high-pressure sodium to a 100-watt induction. Parking canopy fixtures were also retrofitted from 40 watt fluorescent to 28 watt fluorescent, also using the same fixture.

Content:**b. Posse Grounds Lighting Project**

In 2009, the City decided that an important element of its dark skies program was addressing the lighting at Posse Grounds Park. This park is situated on a prominent hill and serves as the main team sport facility for the City. Community football, soccer and baseball teams, etc. use this park and the existing lighting consisted of older fixtures.

On May 10, 2010, the City of Sedona was approved to receive an Energy Efficiency and Conservation Block Grant as part of the American Recovery and Reinvestment Act in the amount of \$93,719.81. The grant was to be used to upgrade the lights illuminating the Posse Ground Park softball fields to more energy efficient fixture. An additional benefit of replacing the softball field lights was that dark sky compliant fixtures were installed that significantly reduced the light spillage into adjacent neighborhoods as well as into the night skies. The lights were installed in late 2010.

At the time, there were 10 light poles (installed in 1998) that utilized a total of (80) 1500-watt lamps to illuminate the two softball fields at the Posse Grounds Park. This Field Lighting Project was intended to lower energy consumption and greenhouse gas emissions, operating costs, and light spill/glare from the park. This project utilized the 10 existing light poles, but replaced the 80 existing lamps with 60 Light-Structure Green™ lamps for a 42 percent reduction in power consumption. The 25-year life-cycle cost savings to the City is expected to be approximately \$110,900.

The total cost of the project was \$123,719.81 of which the city footed \$30,000 and the grant covered the rest.

Content:

c. Uptown Enhancement Project

In July of 2007, the City of Sedona completed a 3.66 million dollar enhancement project for the Uptown corridor. Included in this comprehensive project was the installation of pedestrian lighting as follows:

33, 15-foot tall pedestrian lights poles fitted with light fixtures manufactured by Visionaire, model Monterey Series 1, 70-watt high-pressure sodium. These fixtures are dark-sky compliant (See attached Monterey cut sheet for specifications).

Content:

d. State Route 179 Widening Project

The State Route 179 widening project was an ADOT construction project. It was completed at the end of 2011.

The design of the road and the choice of dark-sky compliant lighting were citizen-, not ADOT-, driven. In fact, ADOT had to bow to citizen (including KSB) pressure to involve the public in the whole design process.

The final design included the installation of 24, 30-foot tall light poles and 74, 15-foot pedestrian light poles within the City limits. The 15-foot tall light poles were fitted with light fixtures manufactured by Visionaire, model Monterey Series 1, 150-watt high-pressure sodium. These fixtures are dark sky compliant.

The 30-foot tall light poles were fitted with light fixtures manufactured by Visionaire, model Monterey Series 2, 250-watt high-pressure sodium. These fixtures are dark-sky compliant (See attached Monterey cut sheet for specifications).

Content:**e. State Route 89A Roadway Lighting Project**

The State Route 89A roadway lighting project was another ADOT construction project. Authority, liability, maintenance and safety responsibility for SR89A lie with ADOT because the state, not the city, owns this road. To improve safety at night for pedestrians walking along or wishing to cross SR89A, ADOT proposed in 2006 to install continuous roadway light (CRL) on a 2-mile stretch of 89A through West Sedona. To be used were ADOT's standard light-polluting highway fixtures of 30-foot high poles with 20-foot mast arms, cobra heads with 200 W HP sodium lamps. However, Sedona citizens and civic organizations, foremost KSB, concerned with protecting Sedona's dark sky, vehemently opposed the CRL. After 6 years of discussions pro and con CRL, ADOT finally got its way with CRL and brought the project to its conclusion in October 2012. But instead of the 70 originally planned light-polluting fixtures, 104, 35-foot tall light poles and 4, 20-foot light poles were installed.

All poles were fitted with light fixtures manufactured by Visionaire, model Monterey Series 1, 150-watt high-pressure sodium. These fixtures are dark sky compliant (See attached Monterey cut sheet for specifications).

The Monterey blends decorative architectural styling with high-performance optics. The unique design captures the rustic look and feel of the southwest with a bell shape reflector shade and choice of elegant mounting arms. Provides the designer and owner the freedom to create a distinctive theme or signature look.

The advanced optical system provides highly efficient, vertical lamp, flat lens, full cutoff illumination for neighborhood friendly, Dark-Sky approved outdoor lighting.

Available in three enclosure sizes with four distribution patterns. A wide selection of light sources from 35 through 1000 watts are offered, including Pulse Start Metal Halide lamps for superior efficiency, lumen maintenance and color stability.

Applications include shopping centers, parking lots, and virtually any general outdoor area lighting.

Housing

- Quality one-piece .080 spun aluminum shade and durable cast aluminum top cap in 3 housing sizes. External hardware is stainless steel.

Lens and Door Assembly

- One-piece spun aluminum removable door assembly.
- Lens is clear tempered flat glass, secured by galvanized lens retainers. Fully gasketed with a form fitting one piece premium extruded silicone gasket to provide complete weather and insect protection.

Optical System

- High-performance vertical lamp, multi-faceted, full cutoff, segmented, 95% reflectance anodized aluminum reflectors. CNC cut and bent for precision and consistency. Available in four distribution patterns.
- Field rotatable reflector (except Type V).
- Tool-less reflector entry.

Quall-Guard® Finish

- Aluminum fixture components are chemically pretreated through a multiple-stage washer and finished with an electrostatically-applied, thermoset polyester powder coat textured paint with a minimum of 3 to 5 mils thickness. Finish is oven-baked at a temperature of 400 °F to promote maximum adherence and finish hardness. All finishes are available in standard and custom colors.
- Finish is guaranteed for two (2) years.

Mounting

- Monterey mounts to a wide selection of decorative and custom mounting arms for both pole and wall mount applications (see Decorative Arms section of catalog.)

Electrical Assembly

- All ballasts are premium HPF autotransformers, available in Metal Halide, High Pressure Sodium, Low Pressure Sodium, and Pulse Start Metal Halide. Ballast is capable of providing consistent lamp starting down to -20 °F. Modular ballast assembly is easily removable with keyhole slots.
- Socket is a glazed porcelain medium or mogul base with nickel plated contacts, rated at 4 kV (5 kV for 1000 watt) and 600 V.

Options

- Button type photocell
- Fusing
- Internal light shield
- House side light shield

Listings

- Monterey is  listed, suitable for wet locations.
- Dark-Sky Friendly™ certified by the International Dark-Sky Association.
-  compliant.

iv. Sunset Park

There are 3 fully shielded goose neck style lights attached to the restroom building with compact fluorescent lights, unsure of the wattage for these.

There are 10 fully shielded bollards along pedestrian walkways, with 70-watt metal halide bulbs.

No lights on the tennis court or basketball court; the park is closed at dusk.

v. Posse Grounds Park

Tennis and basketball courts (see picture below) has a total of 16 fully shielded shoe box style lights with 150 watt high pressure sodium bulbs. These are on demand with a timer.

Recreation room (see picture below.) next to utility field has 4 fully shielded wall packs with 30-watt compact fluorescent lights.

There are no lights on the restroom/concession stand adjacent to the baseball fields.

vi. Teen Center

Recessed fully shielded can lights under the eave overhangs.

Unknown number and type of bulb.

vii. Two Pump stations

One pump station on Shelby Drive

The second pump station on Brewer/Ranger Road.

Seven total wall packs (see picture below) with shield insert to achieve fully shielded, with 70-watt metal halide bulbs.

Content:

- a. City of Sedona Outdoor Lighting Small Grant Program Requirements

Outdoor Lighting Small Grant Program Requirements

The City of Sedona has developed a grant program as an incentive to assist owners of commercial properties and businesses bring their legal non-conforming and grandfathered outdoor lighting into compliance with the City's existing outdoor lighting ordinance (Article 9, Section 911, Sedona Land Development Code). It is the intent of this program to ensure, insofar as possible, that properties receiving a grant install dark sky lighting fixtures and bulbs that comply with the City's outdoor lighting ordinance.

Program Overview

Grant Amount: Requests for Small Grant Program funds cannot exceed a maximum of \$10,000 per eligible property. Requests for more than \$10,000 require City Council consideration and approval. Grants will be awarded based on the availability of funds.

Owner Contribution Requirement: This is a matching grant program. Grant recipients are required to contribute an amount equal to at least 50% of the approved project cost. Requests for the property owner's contribution to be less than 50% of the approved project cost requires City Council consideration and approval. After the grant award is made, the City is not responsible for cost-sharing any increases in the total cost of the project.

Reimbursement Requirement: The program is a reimbursement program. Payment of the grant award will be made after the work is completed, City staff has inspected and documented the work, and paid invoices have been submitted.

Pre-Application Meeting: Potential applicants are required to consult with the designated staff member prior to applying for the Small Grant Program. The purpose of this meeting is to discuss application requirements and eligibility of the proposed work.

Application Deadline: Applications must be received by the City no later than 5:00 pm on Monday, October 15, 2012. Applications received after this date may be considered in the next grant cycle.

Review Process: Applications will be reviewed within 45 days of the application deadline. To qualify for funding, applications must be complete and in compliance with all requirements. Incomplete or non-compliant applications will be denied. All applications will be evaluated on a competitive basis according to the scoring criteria. Additional material or data may be requested as necessary to assist in the evaluation of the application.

Approval: Once an application has been reviewed and a grant awarded, the City shall issue a notice of grant award to the property owner.

Site Visit: City staff may visit the property as part of the application review and during the progress of the work. City staff will conduct a site visit upon completion of the project.

Project Time Frame: Work may not begin until after the application has been reviewed, approved, and a notice of grant award issued by the City. Project work must begin within 45 days of the date on the notice of grant award and be completed by June 1, 2013. Failure to complete the project within this timeframe will result in the loss of the grant and the property owner will be ineligible to apply during the next grant cycle.

The property owner shall provide periodic updates to City staff regarding the progress of the project. The property owner must notify the City as soon as possible if the project does not move forward at any point after notice of grant award. If the property owner fails to notify the City that the project is not moving forward, the property owner will be ineligible to apply during the next grant cycle.

It is the responsibility of the property owner or their authorized representative to obtain all required building and electrical permits, inspections, and approvals for the approved scope of work. All time frames required by these permits shall be complied with in addition to the time frames required by the Outdoor Lighting Small Grant Program. Building permit fees will be reduced by 50%.

Termination/Suspension: A grant may be suspended or terminated before the completion date at the request of the property owner or if, in the sole opinion of the City, performance is unsatisfactory or the grant conditions are not being met.

Disbursement of Funds: Small Grant Program funds are provided on a reimbursement basis once the entire project is completed. The property owner is responsible for notifying the City's Outdoor Lighting Small Grant Program Committee when the project is complete. The City will conduct an inspection to verify the work is complete as per the approved grant funding application. The property owner must submit the final bill for the completed pre-approved work by June 1, 2013. After inspection, the grant reimbursement to the property owner will be processed. Reimbursement of the grant amount will be processed no later than June 30, 2013. **Reimbursement for eligible expenses will not be made for expenses incurred prior to the date of the notification of grant award.**

Eligibility Requirements

1. Property is located within the City of Sedona.
2. Property has existing legal non-conforming or grandfathered outdoor lighting.
3. Application is complete.
4. Application is signed by the property owner or authorized agent.
5. All application submittal requirements are included.

Application Review and Award

Applications received by the deadline will be reviewed by the Outdoor Lighting Small Grant Program Committee based on the criteria outlined below and ranked according to the number of points (100 maximum) the applications receive. Grants will be awarded in the order in which the applications are ranked, with the applications which score the highest being awarded grants first. Grants will be

awarded until program funds are exhausted. In a case of a tie in ranking where program funds are insufficient to award grants to all tied applicants, the tie shall be broken by random lottery system.

The maximum possible points allowed for each section of the Grant Application is specified below:

Part I - General Information – (10 points)

Part II – Property Owner Lighting Information – (35 points)

Part III - Scope of Work – (35 points)

Part IV - Cost Estimates/Proposals – (10 points)

Part V - Application Submittal Requirements - (10 points)

RESOLUTION NO. 2013-46

A RESOLUTION OF THE COCONINO COUNTY BOARD OF SUPERVISORS, SUPPORTING THE EFFORTS OF "KEEP SEDONA BEAUTIFUL" IN OBTAINING A DARK SKY COMMUNITY DESIGNATION FROM THE INTERNATIONAL DARK-SKY ASSOCIATION.

WHEREAS, Sedona is recognized world-wide as one of the most unique and picturesque locations in the United States; and

WHEREAS, the Sedona Mayor and City Council desire to further the charge set forth in the City's Vision Statement, "to be a city that is constantly vigilant over the preservation of its natural beauty, scenic vistas, pristine environment, and cultural heritage"; and

WHEREAS, among the most precious assets of the City of Sedona are its dark skies where the Milky Way is not only visible but also a bright presence and the spectacular views of the heavens are enjoyed by both residents and visitors and;

WHEREAS, being the precious resource that it is, protection of our dark skies requires the collaborative efforts of citizens, businesses, community groups such as Keep Sedona Beautiful and others working together in order to protect and preserve the unique scenic beauty of our nighttime skies, and;

WHEREAS by ultimately obtaining the designation of being a "Dark Sky Community" from the International Dark-Sky Association Sedona's ability to promote and protect its dark skies will be enhanced.

NOW, THEREFORE, BE IT RESOLVED BY THE COCONINO COUNTY BOARD OF SUPERVISORS:

That the Coconino County Board of Supervisors supports the efforts of Keep Sedona Beautiful in pursuing a Dark Sky Community designation. The International Dark-Sky Association is respectfully encouraged to consider formally designating Sedona as a "Dark Sky Community."

APPROVED AND ADOPTED by the Coconino County Board of Supervisors this 13th day of August, 2013.

Mrs. Joanne Kendrick
Chair, Dark-Skies Committee
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne,

I would like to strongly endorse your efforts to obtain Dark Sky certification for Sedona from the International Dark-Sky Association. I believe that dark skies, so rare in much of our country, are an important environmental resource that should be protected -- just like clean water, clean air and other natural resources. The satellite photos of the USA at night show that dark skies are not so common.

I also believe that Sedona residents and visitors will benefit from Dark Sky certification. The realization of this Dark Sky asset makes Sedona an even more

attractive place to live and to visit. From previous communications with the City and with the Chamber, I know that there is a strong interest in Dark Sky certification.

I hope that one day Sedona amateur astronomers will be able to hold viewing sessions to demonstrate the wonders of the sky that can be seen from dark sky locations. In fact, I hold a viewing session at my house every year for a group from the Sedona Westerners hiking club. They are always quite impressed.

Best of luck with this project.

Sincerely,

A. J. Cook

Dear Mrs. Kendrick:

As a resident of Sedona, I strongly endorse and support the efforts of Keep Sedona Beautiful in the pursuit of a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Viewing the night sky from a dark location is a magical experience revealing unparalleled beauty. One never tires of the seeing the Milky Way in all it's majestic glory by just looking up on a dark night here in Sedona. Indeed, I retired here in part because of Sedona's dark night sky's in order to pursue by amateur astronomy and astrophotography hobby. Living here, it's hard to imagine how many millions of people who live in light polluted cities can't even see individual bright stars. We are fortunate and grateful here in Sedona to have dark skies to enjoy. Again, my strong endorsement for your efforts to protect this valuable and disappearing resource.

Sincerely,

Stephen J Leshin M.D.

Sedona National Night Out

August 6, 2013

Sedona's National Night Out was a celebration hosted by the Sedona Police Department at the Posse Grounds Park in Sedona. There was participation from public service agencies and private organizations. Keep Sedona Beautiful Dark-Sky Committee participated in this event by having an exhibit table. We talked with residents about the Dark-Sky Community designation, light pollution, and preserving the night sky. National Night Out is designed to increase community involvement and strengthen partnerships between the community and local public safety agencies.

Refreshments were served.

**Star Party at Red Rock State Park
November 9, 2013**

Keep Sedona Beautiful and Astronomers of Verde Valley (AVV) offer a Star Party for the public on November 9, 2013, at the Red Rock State Park. This Star Party is a great opportunity for families to spend an evening sky together exploring the night sky and to learn about preserving our dark sky. J.D. Maddy, president of AVV, will give an astronomy presentation. Following the presentation, there will be viewing of the wonders of the heaven through telescopes.

There will be craft projects available for the children as well as refreshments.

b. i.

Article in Kudos Newspaper:

11/4/2013 3:29:00 PM

Goodnight Summer Sky

Final Star Party of the season at Red Rock State Park

Goodnight Summer Sky

Final Star Party of the season at Red Rock State Park

Red Rock State Park will be hosting our final Star Party of 2013 on Nov. 9 at 7:15 p.m. In collaboration with Astronomers of the Verde Valley and Keep Sedona Beautiful, Inc., our theme for the final star party will be "Goodnight Summer Sky."

Star Parties are a great way for families to enjoy the evening sky together, there will even be a chance for children to shake hands with a surprise guest—perhaps one from another world?

Keep Sedona Beautiful, Inc. is a local organization dedicated to preserving the beauty of Sedona. They are currently in the process of securing the Dark Sky Community designation for Sedona. Red Rock State Park is excited to partner with KSB to help meet some of the requirements in order to receive this title and help protect the beauty of our city. "Keep Sedona Beautiful is excited to be a partner in sponsoring this fun and interesting star party. Once you look through one of the telescopes you may want to make astronomy your new hobby. Come and enjoy the beauty of our Sedona night sky!"

The evening begins at 7:15pm with a presentation that will last approximately 45 minutes given by JD Maddy, president of the Astronomers of the Verde Valley. Topics of discussion include current astronomical events such as the comet ISON, Nova Delphini, Meteor Showers, as well as the winter constellations.

Following the presentation there

From left, Keith Ayoite (Park Manager), Allen-Eric Bozonas (Assistant Park Manager), J.D. Maddy (Astronomers of Verde Valley), and Bergit Loewenstein (Keep Sedona Beautiful)

will be telescope viewing available from 8 to 10 p.m. Neptune and Uranus will be visible, as well as the clusters of Perseus, Auriga, Cassiopeia, Pleiades, and a seven day old moon.

Several planetary nebulas, or exploded stars, may also be seen.

There will also be a craft project available for children during the presentation as well as snacks, and warm drinks. Please bring bottled water and a folding chair for your own comfort and dress appro-

priately for cool weather. If you would like to bring a flashlight, please cover the end with red cellophane to minimize light interference on the viewing scopes.

This program will require a \$5 reservation fee per person prior to the event; children 14 and under are free. The \$10 entrance fee will also be applied upon arrival. Parking is limited for this event, so please call early to make a reservation (928) 282-6907.

News release from Red Rock State Park, November 2013

- **ACTIVITIES SCHEDULE**
- **RED ROCK STATE PARK**
- **November 2013**

- Contact: Halley Bagley/ Park Ranger
 - hbagley@azstateparks.gov
 - **Reservations / Inquiries:**
 - **928-282-6907**

- **November at Red Rock State Park features a Navajo speaker, a monthly-guided geology walk, daily-guided tours, birding, and star parties.**
-
- Red Rock State Park is located at 4050 Lower Red Rock Loop Road. Our lecture series this month will feature Evangeline Parsons-Yazzie Ed.D. speaking about the forced migration of the Navajo people. Parsons-Yazzie is a local author and teacher. We will also be hosting a Star Party and presentation with the Astronomers of the Verde Valley and also offer twice-weekly bird hikes, and daily nature walks with knowledgeable naturalist.

- **Lecture Series, *The Long Walk of the Navajo People***
- **by *Evangeline Parsons-Yazzie Ed.D.***
- Evangeline Parsons-Yazzie will present the November Lecture Series Program on Sunday, November 24th, 2013. Evangeline is a professor at the University of Northern Arizona and is also an author published by Salina Bookshelf, Inc. Her work includes Navajo language books for both adults and children. She will be releasing a new book in January.
-
- Evangeline will be speaking about the migration of the Navajo people from 1864-1868. The Long Walk, also known as *Hweeldi* by the Navajo people, refers to the event where the Navajo people were forced to walk over 450 miles to Fort Sumner, New Mexico. The Navajo version of this unfortunate event has mostly remained an oral history for the Navajo people; Evangeline will discuss her ancestors experience during those times.
-
- Evangeline Parsons-Yazzie's father taught her about their Navajo ancestry including culture, language and history. A vital lesson her father shared with her about learning the Navajo language was to "speak from the heart." which became inspiration for her first novel, a historical romance in the time of war.
- Prior to Evangeline's historical romance, she wrote several Navajo language books including

Star Party, November 9th 7:15PM:

Red Rock State Park will be hosting our final Star Party of 2013 on November 9th at 7:15 pm. In collaboration with Astronomers of the Verde Valley and Keep Sedona Beautiful, our theme for the final star party will be “ *Goodnight Summer Sky* “. Star Parties are a great way for families to enjoy the evening sky together, there will even be a chance for children to shake hands with a surprise guest- --perhaps one from another world?

The evening begins at 7:15pm with a presentation that will last approximately 45 minutes given by JD Maddy, president of the Astronomers of the Verde Valley. Topics of discussion include current astronomical events such as the comet ISON, Nova Delphini, Meteor Showers, as well as the winter constellations.

Following the presentation there will be telescope viewing available from 8:00pm to 10:00pm. Neptune and Uranus will be visible; as well as the clusters of Perseus, Auriga, Cassiopeia, Pleiades, and a seven day old moon. Several planetary nebulas, or exploded stars, may also be seen.

There will also be a craft project available for children during the presentation as well as snacks, and warm drinks. Please bring bottled water and a folding chair for your own comfort and dress appropriately for cool weather. If you would like to bring a flashlight, please cover the end with red cellophane to minimize light interference on the viewing scopes.

This program will require a \$5.00 reservation fee per person prior to the event; children 14 and under are free. The \$10.00 entrance fee will also be applied upon arrival. Parking is limited for this event, so please call early to make a reservation 928-282-6907.

Wednesday and Saturday Bird Walks, 8:00 AM: Bird walks begin at 8:00 AM on Wednesday and Saturday mornings. Bird enthusiasts join a naturalist for a guided walk appropriate for beginner and advanced birders. Bring your own binoculars; only a limited number are available for loan from the park. The Hummingbird Patio is an excellent spot to start your tour. Another good viewing point is the visitor center roof. Most year-round birds are found in the riparian area next to Oak Creek or along the field behind the visitor center. The Audubon Society has designated Red Rock State Park as an Important Birding Area (IBA) because of the many species that live or visit here. **Geology Walk November 10th, 2:00 PM**

- Red Rock State Park is located at the base of the Mogollon Rim, the southern edge of the Colorado Plateau. The escarpment is over 200 miles long and ranges in elevation from 2,000 to 3,000 feet. Over millions of years of erosion the rim has receded over four miles leaving behind the picturesque features of Sedona.
- Our monthly-guided geology walk will be held on November 10th at 2:00PM. Join our knowledgeable volunteers as they venture out on our trails and discuss how Sedona transformed into what we see today. This is an interpretive experience for both the beginner and experienced hiker, lasting between 2-2 ½ hours and an elevation gain of 250 feet. **Please bring water and wear suitable footwear.**

•

• **Daily Guided Nature Walks and Activities, 10:00 AM and 2:00 PM:**

- At 10:00 AM everyday, a volunteer naturalist leads a guided nature walk informing visitors about the different life zones of Red Rock State Park. The subjects discussed on this walk include geology, wildlife, history, archeology, and plant life. The naturalists welcome questions during the walk, enhancing the learning experience.
- During the afternoon, the park hosts a 45-minute ranger/naturalist-led walk, various presentations depending on the season and nature videos.

•

• **Picnic Areas and Shelters:**

- Several covered ramadas and picnic tables are available to reserve throughout the park. The ramadas feature charcoal barbecue grills, picnic tables, electrical outlets, water and nearby restrooms. To inquire about reserving a ramada for groups, please call **928-282-6907**. These areas are also available for daily visitors.
- Red Rock State Park is a “*pack in-pack out*” facility and does not provide trash receptacles. Please remember to “*pack out*” your trash with you to help us protect the environment and wildlife.

•

• **Hike on Your Own!**

- The family-oriented trail system is well marked for safety and enjoyment if you prefer to explore on your own. Five miles of trails have interconnecting loops leading to red rock vistas or along the lush greenery of Oak Creek. The three major loops are connected along the riparian corridor by the **Kisva Trail**, which also leads to the short loop of the **Yavapai Ridge Trail**. The **Javelina Trail** takes you into the pinion/juniper woodlands and back to the other loops.

Detailed information is available at the Visitor Center. Bikes and horses are allowed on designated routes, which are limited.

-
- **Junior Rangers:** A Junior Ranger program is available for children between the ages of six and twelve. Junior Rangers pledge their part in helping preserve the beauty of the park for everyone! Junior Ranger booklets, available at the Visitor Center, have activities to complete and, once approved by a Ranger, the newest Junior Ranger at Red Rock State Park is sworn in after taking the pledge and receiving a Junior Ranger button.
-
- **Visitor Center and Theatre:** The Park Visitor Center features many displays about the area's geology, archaeology, flora and fauna, including an interactive relief map of Sedona and computer programs about various park features, such as the House of Apache Fires. The popular video, "*The Natural Wonders of Sedona*", narrated by local voice-over artist John Conway, is shown several times daily in the Park Theatre. The video features aerial explorations of ancient Indian ruins and dramatic landscapes, colorful desert wildflowers, and local wildlife.
-
- Join us here at Red Rock this November or any time of year for your next adventure! Whether you're attending a planned event or hiking on your own, you'll enjoy our trails and facilities, making for a great day with the family or a bit of solitude for yourself.
-

**Keep Sedona Beautiful (KSB) Speaker Series
November 13, 2013**

KSB has a popular Speaker Series program of monthly presentations by invited speakers. On November 13, Dennis Young, an internationally known astronomer and photographer, and Sedona resident for the past 28 years, will speak about Astro-Scenic Photography of Sedona and Arizona Landscape. He will present his photographs of Comets, Fireballs, Northern Lights, and more that have graced the dark sky of Sedona in years past.

Keep Sedona Beautiful presents program on Astro-Scenic Photography

"Astro-Scenic Photography" will be the topic at Keep Sedona Beautiful, Inc.'s Preserving the Wonder™ Speaker Series on Wednesday, Nov. 13.

The evening will begin at 5:30 p.m. with complimentary offerings of appetizers donated by El Rincon Restaurante Mexicano and refreshments provided by KSB. The presentation will begin at 5:45 p.m.

Come join Keep Sedona Beautiful ("KSB") and feast your eyes on Dennis Young's brilliant photographs of the starry night skies of Sedona and other choice places framing the beautiful desert skies of Arizona.

The presentation will feature photographs of comets, fireballs, northern lights and more. As is true for all cities, population growth and technological progress, especially in lighting, have taken a toll on the natural dark skies of Sedona. KSB is partnering with Dennis and others in pursuing a Dark-Sky Community designation from the

International Dark-Sky Association (IDA) for the City of Sedona.

Internationally known astronomer and photographer Dennis Young has been a Sedona resident for 28 years. President of Sirius Lookers, a Sedona-based astronomy club, he leads astronomy programs at local schools, colleges, resorts, state and national parks.

"I started in Detroit but the sky didn't beckon like it does in Sedona," he says. "You can see galaxies with the naked eye here," he says. "It's always changing. A galaxy you've seen before now has a supernova. You can look at a different object each night for the rest of your life and never see the same one."

Keep Sedona Beautiful welcomes the community and visitors alike to its monthly Preserving the Wonder™ Speaker Series, which takes place at its historic Pushmataha Center on 360 Brewer Road in Sedona. Please note that the Speaker Series is now held the second Wednesday each month

The KSB presentation will feature photographs of comets, fireballs, northern lights and more. As is true for all cities, population growth and technological progress, especially in lighting, have taken a toll on the natural dark skies of Sedona.

from September to June, beginning at 5:30 pm with refreshments.

The series presents an interesting diversity of programs relevant to the unique environment of our region. Keep Sedona Beautiful, Inc. is a nonprofit organization that, by acting through the stewardship of its members and to protecting and sustaining the unique scenic beauty and natural environment of the

Greater Sedona Area. For more information about Keep Sedona Beautiful, please call 928-282-4938, or visit <http://www.KeepSedonaBeautiful.org/>.

Star Party at Sedona Posse Grounds

November 22, 2013

Keep Sedona Beautiful and Astronomers of Verde Valley (AVV) offer another Star Party on November 22, 2013, at the Posse Grounds in Sedona. The Comet ISON is the big event for this star party, as well as the public learning about preserving the night sky. J.D. Maddy, president of AVV, will give an astronomy presentation, which is to include photos of Comet ISON. After the presentation, telescopes will be available for an evening of viewing. Refreshments will be served.

A Night Under the Stars

By *Sedona.biz Staff*

KEEP SEDONA BEAUTIFUL
PRESERVING THE WONDER SINCE 1972

Sedona AZ (November 15, 2013) – Come experience the wonders of Sedona’s night sky. Keep Sedona Beautiful (KSB) and The Astronomers of Verde Valley (AVV) will host a “Night Under the Stars” on Nov 22, 7-10 pm at the Recreation Center, Posse Grounds Park, Sedona.

The public is invited to enjoy the display of stars through telescopes provided by AVV. The evening will start off with a brief discussion of the importance of protecting dark skies by preventing light pollution. To this end, Sedona and the surrounding areas have lighting ordinances that will help keep their skies dark for everyone in the future.

J.D. Maddy, President of The Verde Valley Astronomers, explaining lunar eclipse.

Photo Credit:: Susan L. Amon

In a slide presentation of photos taken mostly by local astrophotographers, J.D. Maddy, president of the AVV, will talk about some basics of astronomy, exciting past and current events in our area's night sky, and what you will be seeing through the various powerful telescopes set up for viewing. Comet ISON, its brightest appearance eagerly anticipated in late November and early December, will be a hot topic. The telescopes will show off star clusters, globular clusters, nebulae, planets, colorful double stars; even Neptune and Uranus will be visible and a few galaxies can be seen in Sedona's dark sky. Throughout the year, AVV hosts people from all over the USA and the World to show them the starry sky of Sedona and the surrounding areas. KSB is pursuing a Dark-Sky Community designation for Sedona by the International Dark-Sky Association.

A Night Under the Stars – Nov. 22, 7 – 10 pm, Recreation Center Posse Grounds Park, 525 Posse Ground Rd, Sedona. The event is free. Wear warm clothes. Hot drinks and snacks will be available. Flashlights must be covered by red cellophane. For further information on the event email ksbsedonadarkskies@icloud.com and for information on KSB please call 928.282.4938, or visit

X. Dark Sky Awareness Documents

IDA Requirement:

D) Community commitment to dark skies and education as shown by at least one of the following:

- ii) Inclusion of dark sky awareness documents (IDA brochures or community-created brochures) with other community informational documents for residents and visitors, AND/OR;**

Sedona:

Content:

- a. City of Sedona Good Lights Memo
- b. City of Sedona Good Lights Brochure
- c. International Dark-Sky Association Brochures Distributed by Keep Sedona Beautiful
 - i. Various Organizations
 - 1. Chamber of Commerce
 - 2. Sedona Public Library
 - 3. Home Elements
 - 4. ProBuild
 - 5. Canyon Outfitters
 - 6. The Hike House
 - 7. Sedona Humane Society
 - ii. Residents and Visitors
 - iii. National Night Out, August 6, 2013
 - iv. Tracker Hike 1, Astronomy Presentation, October 2, 2013
 - v. Events
 - 1. Star Parties on November 9, 2013 and November 22, 2013

Content:

a. City of Sedona Good Lights Memo

This memo explains why the "Good Lights...Great Nights" brochure was established.

City Manager's Office

Memo

Date: September 5, 2013
To: Joanne Kendrick
From: Nicholas R. Gioello
Assistant to the City Manager
Subject: City of Sedona lighting brochure

The City of Sedona's lighting brochure, titled "Good Lights...Great Nights" was initially established as a way to provide easy to understand basic information to the public on the benefits of fully shielded lights and to encourage compliance with the City's new outdoor lighting code, which was established as law in September, 2001.

The brochure discusses the intent of the City's lighting ordinance as, "to maintain Sedona's small town character by minimizing light pollution, light trespass and glare, and to conserve energy while maintaining nighttime safety, utility, security, and productivity".

The brochure describes and has pictures of good lights (fully shielded fixtures) and bad lights (unshielded fixtures). Partially shielded fixtures are discussed, as well as, the cap on lumens per net acre for commercial development. The brochure also lists staff members' contact information to answer any additional questions.

This letter is handed out to residents and developers at the Community Development front counter. Copies of the brochure have been made available to Home Elements, a local retail lighting store in Sedona, so that they can be given to their customers who are considering purchasing new exterior light fixtures.

Content:

b. *City of Sedona Good Lights Brochure*

The brochure discusses the intent of the *City's Outdoor Lighting Ordinance* and describes good and bad lighting.

The *City of Sedona* stocks its own brochure (referred to in Section VII c.; **Appendix 3**) in numerous locations throughout its facilities.

It also hands these out at various community events that it participates in throughout the year.

Content:

c. International Dark-Sky (IDA) Brochures Distributed By KSB

i. The KSB Dark-Sky Committee has distributed the IDA brochures to the following organizations:

1. Chamber of Commerce, including their popular Visitors Center.
2. Sedona Public Library
3. Home Elements, a residential lighting store
4. ProBuild, a major home improvement retailer
5. Canyon Outfitters, an outdoors retailer
6. The Hike House, an outdoors retailer
7. Sedona Humane Society, the community animal shelter

ii.

If residents or visitors have questions about lighting, preserving dark skies, or the designation, Keep Sedona Beautiful distributes the IDA brochures to those individuals. We have added KSB's address, phone number, and email address to the brochures so that we may be able to promptly respond to any inquiries.

iii.

At National Night Out on August 6, 2013, KSB Dark-Sky Committee distributed the IDA brochures and the IDA Pollution and Safety brochures to residents and visitors, as we talked about the designation, light pollution, and dark skies.

iv.

KSB Dark-Sky Committee member distributed IDA brochures and IDA Pollution and Safety brochures to people attending the Tracker Hike 1, Astronomy presentation on October 2, 2013. KSB pursuing the Dark-Sky Community designation for the City of Sedona was discussed.

v.

In addition to the above, KSB will distribute IDA brochures at the following events:

1. KSB Dark-Sky Committee will distribute IDA brochures at the two stargazing parties on November 9, 2013 and November 22, 2013.
2. The KSB Dark-Sky Committee will distribute IDA brochures to interested parties at the KSB Speaker Series, November 13, 2013.

XI. Dark Sky Education for School Children

IDA Requirement:

D) Community commitment to dark skies and education as shown by at least one of D i) D ii) D iii):

iii) Inclusion of dark sky education in community schools and curriculum.

Sedona:

Content:

D i and D ii were completed. Next year (2014), Keep Sedona Beautiful plans to partner with a local astronomer to offer star parties for school children (D iii).

XII. Success in Light Pollution Control

IDA Requirement:

E) Success in light pollution control. At least one of the following conditions must be demonstrated:

- i) Examples of a minimum of ten projects built under the lighting code, demonstrating effective application of the local lighting code, AND/OR;**
- ii) Alternative demonstration of success in light pollution control**

Sedona:

Content:

a. As required in section E i) above, the City has achieved real success in implementing dark skies standards. The response to the City lighting code from Builders has been positive. While new building construction has been quite modest over the past several years, the City has succeeded in implementing the code and associated dark skies requirements in twenty-eight projects. The following chart outlines these projects.

The following information details all new construction and building additions within the City of Sedona since the establishment of the City of Sedona Outdoor Lighting Ordinance (Dark Sky). All of these projects were required to comply with the Outdoor Lighting Ordinance.

From January 2002 until the end of August 2013, the following single-family houses and multi-family new construction projects were completed:

Single-family (including manufactured and factory built houses) 557
Multi-family and attached single family projects 29

The following table lists 29 non-residential (commercial, lodging and timeshare) new construction projects and additions since January, 2002.

Name of Project	City reference number & year	Type of construction
Arroyo Roble Village Shops,	DEV2002-14	New commercial building
Bank One	DEV2002-10	New commercial building
Legacy Plaza	ZC2003-2 and DEV2003-4	New commercial building within existing development
Serge Wright Offices	DEV2002-15	New commercial building within existing development
Sedona Summit Resort Phase 4	DEV2002-13	Time share resort expansion with new buildings within an existing development
Jewish Community of Sedona	DEV2001-1 and CUP2001-3	New commercial building
Piedras Del Rojo	SUB2003-6 and DEV2003-7	New multi-family development
Sun Building	DEV2003-9	New commercial building
Arroyo Pinon Condominiums	SUB2004-6 and DEV2004-7	New multi-family development
Artz 'N' 1	ZC2004-2 and DEV2004-2	Rehabilitation and expansion of a commercial development
Sedona Humane Society	DEV2004-4	New commercial building

City of Sedona – Construction projects from January 2002 through August 2013

Created 9/5/2013

Tiaquepaque – Patio del Norte	DEV2004-6	Expansion of a commercial development
Boots and Saddles Bed and Breakfast Addition	DEV2005-4	Expansion of an existing bed and breakfast development
Eagle Cliff Business Park	DEV2005-3	New commercial building
Pine Terrace Condominiums	SUB2005-9 and DEV2005-8	Rehabilitation of an existing multi-family development
Sedona Real Inn Phase II	ZC2005-4 and DEV2005-7	Lodging expansion with new buildings within an existing development
Sedona Summit Unit II, Phase 5	DEV2005-13	Time share resort expansion with new buildings within existing development
View Plaza	SUB2005-15 and DEV2005-11	New commercial building
Amara Resort Spa	ZC2006-1 and DEV2006-4	New commercial building within existing development
Church of the Red Rocks Addition	DEV2006-10 and CUP2006-3	Addition to an existing development
Harry Christie Project	ZC2006-2 and DEV2006-5	New commercial building and multi-family mixed use development
La Tierra Plaza and The Adobe Lodge	ZC2006-4 and DEV2006-8	New commercial building within existing development
Lumbermens	DEV2006-13	New commercial building
Park Place	DEV2006-3, SUB2006-3	New multi-family development
Soldiers Pass Plaza	DEV2006-2	New commercial building within existing development
KFC/Taco Bell	DEV2008-3	New commercial building
L'Auberge de Sedona Redevelopment	ZC2008-3	Lodging expansion with the addition of new buildings.
Natural Grocers	DEV2011-1	New commercial building

The City of Sedona replaced all of the legal non-conforming ball fields light fixtures at the Sedona Posse Grounds Park with fully shielded light fixtures on February 1, 2011.

The City is currently replacing all legal non-conforming exterior light fixtures at the City Hall complex. The project is approximately 80% complete and anticipated to finish in November, 2013.

Below are pictures of the Natural Grocers development. This building was built less than two years ago under the Sedona Outdoor Lighting Ordinance.

Below are pictures of the lights at the KFC/Taco Bell. These buildings were built about four years ago under the Sedona Outdoor Lighting Ordinance. Please note that only bollards are used in the parking areas, there are no pole lights. Only recessed cans under eaves are used on the building, and no wall packs or sconces are used.

XIII. Sky Brightness Measurement Program

IDA Requirement:

F) A sky brightness measurement program must be maintained either by the community or by another public or private organization (university, research center, IDA chapter, astronomy club, etc.) to follow the evolution of light pollution in the IDA DSC. Installation of at least one permanently mounted Night Sky Brightness Monitor and participation in the IDA Global Sky Monitor website is recommended, AND;

Sedona:

Content:

- a. Keep Sedona Beautiful Dark-Sky Committee's Procedure to Conduct the Sky Brightness Measurements
- b. Sky-Quality Measurement Device - SQM-L is the measurement device used for October 4, 2013, and it will be the device of choice in the future.
- c. Sky-Quality Measurements Performed on October 4, 2013
- d. Sky-Quality Measurement Device used for July 8, 2013, was the IDA Dark Sky Pro iPhone application and a borrowed Unihedron SQM device.

- a. Keep Sedona Beautiful Dark-Sky Committee's Procedure to Conduct the Sky Brightness Measurements
- The KSB Dark-Sky Committee has conducted three sky-quality measurements for Sedona in the months of July, August, and October 2013.
 - The KSB Dark-Sky Committee will conduct several sky-quality measurements each year.
 - The KSB Dark-Sky Committee conducts the night-sky quality by the following procedure:
 - Sky-quality measurements are taken on or close to the New Moon
 - Six different measurements are made for each location.
 - The first measurement is not considered. An average of the second through sixth measurement is recorded as the average sky quality reading for each location.
 - Percent of cloud cover is noted for each location
 - GPS reading is taken and recorded for each location.
 - The time is recorded for each location
 - The street location is given for each location
 - Some examples of where the sky-quality measurements are taken are as follows:
 - Sky-quality readings are taken along 89A and one block back
 - Sky-quality readings are taken along 179 and one block back
 - Sky-quality readings are taken in Uptown
 - Sky-quality readings are taken at Red Rock High School
 - No permanently mounted Night Sky Brightness Monitor is installed because of probable damage by Arizona strong sun. As noted above, the KSB Dark-Sky Committee will conduct annual sky-quality measurements.

XIV. Keep Sedona Beautiful Tasks After Receiving Dark-Sky Community Designation

IDA Requirement:

G) Designation is permanent, but is subject to regular review by IDA and possible revocation if minimum requirements are not maintained. More details may be found in the "Reassessment of IDA DSC designation" section.

Sedona:

Content:

Keep Sedona Beautiful (KSB) understands that this designation is subject to regular review and possible revocation. We are committed to maintaining our designation into the future. To that end, KSB has plans to do the following:

Upon receiving the designation

KSB has, and will continue to have, a permanent Dark-Sky Committee that will be tasked with the following:

- a. Monitoring of the Community's Night-Sky Quality by regular measurements
- b. Following up on the City's grant program to help businesses convert non-compliant grandfathered lighting to dark-sky compliant lighting
- c. Setting up annual educational programs including the following:
 - a. Distribution of relevant brochures
 - b. A minimum of two (2) annual star parties
- d. A speaker annually at the KSB Speaker series with topics related to astronomy and dark skies
- e. A minimum of one educational program for school children annually
- f. Submission of the October 1st annual report to IDA

XV. Annual Report

IDA Requirement:

H) Periodic checks, through the submission of the annual report due October 1st, will be performed to ensure that minimum standards and objectives of the program are being upheld and adequate progress is being made. This report is a short 1 to 2-page synopsis of the community's activities and initiatives throughout the last year. The Borrego Springs, CA report is included on the website for reference www.darksky.org/communities.

Sedona:

Content:

Keep Sedona Beautiful understands the value and importance of periodic checks. Please see XIV above for our program of compliance.

XVI. Wording for Designation

To Be Included In IDA DSC Submission

E) Proposed alternative wording for an IDA DSC (e.g. Dark Sky Village, Starry Sky City, etc.), if desired.

- a. Keep Sedona Beautiful Dark-Sky Committee proposes wording of “Sedona International Dark-Sky Community”.

Sedona aims for dark-sky status

Written by Ron Eland

August 23rd, 2013

Sedona may soon become one of only four cities in America to hold a unique distinction.

The local group Keep **Sedona** Beautiful has been busy this summer garnering support for the city to become a **Dark-Sky** Community as recognized by the International **Dark-Sky** Association. If all the requirements are met, **Sedona** will join Flagstaff, Borrego Springs, Calif., and Homer Glen, Ill., with that honor.

The **Sedona** City Council will consider a resolution supporting KSB's efforts to become a **Dark Sky** City during its next meeting on Tuesday, Sept. 10. The **Sedona** Fire District gave its support earlier this month.

For the full story, see the Friday, Aug. 23, edition of the **Sedona Red Rock News**.

CLOSER: KSB leading the push to earn dark-sky status

From Page 1A

Fire District gave its support earlier this month.

"Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States, defined in daylight by its distinctive red-rock landscape and beautiful Oak Creek Canyon," said Joanne Kendrick, KSB's Dark-Sky committee chairwoman.

"Sedona also offers a magnificent sky. Residents and visitors alike marvel at and treasure the spectacular night views of the heavens afforded by Sedona's dark skies."

She said the IDA has set guidelines that must meet in order to become designated as a Dark-Sky Community. The most challenging requirement is to have a quality comprehensive lighting code. She said to fully meet Sedona has an outdoor lighting ordinance that meets the IDA lighting code requirement.

Some of the other requirements include a community's commitment to dark skies and quality lighting. Kendrick said the city has a grant program to assist business owners of

resource and provide incentive for its preservation.

Another requirement is to have a broad support for dark skies from a wide range of community organizations. KSB is in the process of accumulating and documenting that support from the City Council, Sedona Chamber of Commerce and other community organizations, businesses, as well as the support from the community.

There are benefits of Sedona being a Dark-Sky Community, according to Kendrick. She said it brings recognition to the area and the designation entitles the city of Sedona to display the IDA Dark-Sky Community logo in official publications as well as signs at the entrance of visiting the community.

This designation will also enhance awareness of dark sky matters to residents and visitors of the community and will provide better support for protection of the natural night, she said.

Ron Eland can be reached at 292-7785, ext. 122 or by email at telent@klarnonnews.com

properties located within the city limits to replace their signs — but not conforming to grandfathered outdoor lighting — with new lighting that is dark-sky compliant and is compliant with the city's existing outdoor lighting ordinance.

"Sedona needs to protect its night skies as they are an important part of why residents and tourists choose to live or visit here," she said. "Designation as a Dark-Sky Community would raise awareness of this natural

Help make Red Rock Country part of Dark Sky Community

By Tom O'Halleran
President - Keep Sedona Beautiful

Monday, September 30, 2013

Our starry night skies - one of the wonders visitors marvel at, while we get to enjoy each cloudless night. I can't tell you how many people have told me how spectacular our night skies are.

As you know, they are a large part of what drew many area residents to this area: to witness the brightness and magnificence of our sunsets as darkness settles in, revealing the awesome vastness of Milky Way and reminding us to consider, even if briefly, what the universe is. Into these dark skies, a stargazer's wonderland, we find answers, more questions, and peacefulness.

We cannot take these skies for granted. And we can all do our part, including supporting the Keep Sedona Beautiful's upcoming application for the City of Sedona to be a certified International Dark Sky Community.

As our area becomes more populated there will be more and more outdoor lighting. If not designed to protect our night skies this lighting will have a negative effect on our ability to enjoy the sensation of seeing so much of our universe: comets crossing the horizon, shooting stars (really particles entering our atmosphere) or the many satellites crossing above us. So many people in today's world are separated from dark skies and removed from this time-honored revelry. Just think about the solitude we enjoy when sitting on our porch or in our backyards enjoying the totality of our night skies.

Over the last couple of decades, Keep Sedona Beautiful (KSB) has been working with various government jurisdictions so their outdoor lighting codes help protect our skies from light pollution. KSB help develop the current outdoor lighting code for the City of Sedona. We also assisted Yavapai County in its development of their initial outdoor lighting code and subsequent revisions.

Over the years we have conducted educational outreach about the importance of protecting our skies from light pollution and produced educational pamphlets for public distribution. In the City of Sedona, KSB has done numerous outdoor lighting surveys to help the city implement a program to refit outdoor lighting that was grandfathered in when the current code was developed. This is a volunteer program where businesses and the city share the cost of new lighting that is in compliance with the current code.

KSB is currently working on obtaining support for the City of Sedona to be certified as an International Dark Sky Community. We will be applying to The International Dark-Sky Association (IDA), located in Tucson, Arizona. Upon certification, the City of Sedona would become only the fifth city to receive this special designation. The first city to receive certification was Flagstaff, Arizona in 2001. We should know the results of the application by early 2014.

IDA's goal is to promote preservation and protection of night skies across the globe. The program aims to protect locations of exceptional nighttime visages for future generations. Certified Dark Sky Communities

excel in their efforts to achieve a community-wide lighting code, promote responsible lighting, dark sky stewardship, and exist as an example to surrounding communities on the possibilities available with proper lighting. The City of Sedona's outdoor lighting code meets these guidelines, and the city has a history of providing stewardship in maintaining our regions dark skies.

KSB is committed to continuing our efforts. Even after receiving a designation, the IDA requires certified communities continue to work towards improving their dark sky environment through education and programs, such as the retrofit program currently in use by the City of Sedona.

Since the City of Flagstaff's designation, the region around the city has started to develop a plan to protect the dark skies on the Colorado Plateau. KSB believes that is the direction our region should take after the City of Sedona receives its designation. Our intent is to work with Yavapai and Coconino Counties and other local governments to obtain a regional designation for the Verde Valley. As we continue to see the glow on the horizon from outdoor lighting in the Phoenix area we must ask the question, "Is that what we want for our region?" KSB believes the answer is clear, "No," and that as a region we want to protect our quality of life now and for future generations.

The City of Sedona and our region deserves a dark sky designation. We have instituted outdoor lighting codes that protect our dark skies, instituted programs to improve retrofit lighting that was grandfathered in when our current code was implemented and have and will continue to educate residents and visitors about the need to protect our skies. We should look to our neighbors in Flagstaff and the Coconino Plateau and realize that together we can create an environment in Northern Arizona that protects our night skies for future generations.

Thank you in advance for showing your support for both the City of Sedona's IDA Dark Sky certification and for working on future dark sky designations for our entire region. Please send KSB an email at sedonadarkskies@gmail.com to show your support or if you have any questions.

Dark Matters

Flagstaff Dark Skies Coalition (FDSC) Web Presence!

In April 2013 we launched a new and improved website at <http://www.flagstaffdarkskies.org>. The upgraded website includes:

- lots of new pictures;
- tips for residential outdoor lighting;
- where to purchase fully shielded lighting fixtures;
- a list of exceptional night sky viewing locations in the Flagstaff area;
- newsworthy items that are "Trending Now";
- scientific links for "Wonks";
- functioning outdoor lighting codes in various municipalities;
- and much more!

We welcome suggestions for new material.

FDSC also has a Facebook page for those of you who have Facebook accounts! In the Facebook search bar type in Flagstaff Dark Skies Coalition. If you enjoy what you see please "Like" us and share the great pictures, quotes, and links with your friends on Facebook.

We would love to feature pictures taken by you of the night sky in the Flagstaff and Northern Arizona area. Please send your pictures to info@flagstaffdarkskies.org or post them on the FDSC Facebook page!

"I often think that the night is more alive and more richly colored than the day."

The End of Night: Searching for Natural Darkness in an Age of Artificial Light

Author Paul Bogard released a new book on the night sky this year. Paul visited Flagstaff many times in the writing of this book and he writes how the citizens of Flagstaff have embraced dark skies as part of the city's identity. Amazon.com, which sells the book, describes it as:

A deeply panoramic tour of the night, from its brightest spots to the darkest skies we have left.

A starry night is one of nature's most magical wonders. Yet in our artificially lit world, three-quarters of Americans' eyes never switch to night vision and most of us no longer experience true darkness. In *THE END OF NIGHT*, Paul Bogard restores our awareness of the spectacularly primal, wildly dark night sky and how it has influenced the human experience across everything from science to art.

From Las Vegas' Luxor Beam--the brightest single spot on this planet--to nights so starlit the sky looks like snow, Bogard blends personal narrative, natural history, science, and history to shed light on the importance of darkness--what we've lost, what we still have, and what we might regain--and the simple ways we can reduce the brightness of our nights tonight.

In these countless stars, in their clusters and colors and constellations, in the "shooting" showers of blazing dust and ice, we have always found beauty. And in this beauty the overwhelming size of the universe has seemed less ominous, Earth's own beauty more incredible.

~ Paul Bogard in "The End of Night: Searching for Natural Darkness in an Age of Artificial Light"

National Association of Counties Conference

by Lance Diskan

With support from Coconino County Supervisor Liz Archuleta and her staff, FDSC members were joined by Deanna Greco of the National Park Service at a table set up during the National Association of Counties Western Interstate Region Conference held in Flagstaff in May. Many positive conversations about Flagstaff's leadership in dark sky protection, and the important economic impacts of being a dark sky community took place with county representatives from around the western United States. Local artists and businesses donated dark sky themed items that were business-card "raffled" to officials attending the event. Our thanks to Dan Duriscoe, Shane Knight, Lynn Overend and Winter Sun Trading Company for helping build awareness for protection of a natural night sky both locally and around the Colorado Plateau.

The FDSC and NPS table at NACo's Western Interstate Region Conference event at Fort Tuthill.

Breaking News: Sedona City Council Votes in Favor of Dark Skies

On Tuesday, September 10, the Sedona City Council voted to support an application to the International Dark-Sky Association to recognize Sedona as an International Dark-Sky Community. The organization, Keep Sedona Beautiful, will submit the application. Flagstaff is the first IDSC, recognized in 2001.

*I have long thought that
anyone who does not
regularly - or ever - gaze up
and see the wonder and
glory of a dark night sky
filled with countless stars
loses a sense of their
fundamental connectedness
to the universe.*

Grand Canyon National Park Planning Lighting Upgrades

by Lance Diskan

The National Park Service has quietly but quickly become a key player in raising awareness about the importance of a natural night sky under its foundational mandate, The Organic Act of 1934. Several western units of the NPS system have already earned designation as International Dark-Sky Parks, with its Chaco Canyon unit (also a UNESCO World Heritage site) in New Mexico being recognized most recently for both exceptional skies and strong visitor programs about the nighttime ecosystem.

Closer to home, Grand Canyon National Park has funded a position to conduct a survey of existing lighting fixtures at the north and south rims. Once collected this data will be used in planning lighting upgrades that will address safety needs while simultaneously guaranteeing that people who visit the park from all over the world will be able to continue to enjoy the nighttime beauties of the canyon.

NPS is also a partner in the emergence of a Colorado Plateau Night Sky Cooperative - a voluntary association of federal, state, county and municipal entities who will be working alongside local landowners, business and environmental groups, and NGO's (like FDSC) who hope to work together on preserving views of an unspoiled western sky.

Sedona To Consider Seeking Dark-Sky Designation

Sedona to consider seeking dark sky designation

SEPTEMBER 09, 2013 5:44 AM

The Sedona City Council is set to vote on whether to seek an official designation recognizing its dark skies.

The council will take up the matter during a meeting Tuesday.

If a designation is sought and approved by the International Dark Sky Association, the city would become just the fifth community in the world to win the honor. Flagstaff was the first such city.

Sedona Mayor Rob Adams tells the Arizona Daily Sun (<http://bit.ly/1cWiNSu>) that the city already has a strong commitment to sustainability and the environment and a dark sky designation would give it more guidelines to move forward.

Adams says a designation would also be good for business.

The chamber of commerce, school district and board of supervisors have all moved to support the application.

- b. City of Sedona Outdoor Lighting Small Grant Program
2012-2013 Applications**

City of Sedona Outdoor Lighting Small Grant Program 2012-2013 Application

Please review the Outdoor Lighting Small Grant Program requirements prior to completing this application. The property owner is required to speak with a staff member assigned to this program prior to submitting this application. Please answer all questions and enter a “NA” for those questions not applicable. Applications will be reviewed according to the criteria established in the Small Grant Program Requirements and points will be awarded by the review committee based on satisfaction of established criteria and the application’s content and clarity. *(Staff Note: The point system/criteria still needs to be developed by the review committee prior to implementation of this program)* Attach additional sheets as necessary when responding to the questions.

The deadline to submit applications for this grant cycle is **Monday, October 15, 2012**. Any application received after this deadline may be considered in a future funding cycle.

To be eligible for the Outdoor Lighting Small Grant Program, lights must be out of compliance and the applicant must provide proof that the lights were legally installed prior to the implementation of the City of Sedona’s current outdoor lighting ordinance.

The maximum grant amount is \$10,000 per property. The property owner must provide at least 50% of the project cost. Exceptions require City Council consideration and approval.

Submit completed application and required documentation to:
City of Sedona Community Development Department
Attn: Outdoor Lighting Small Grant Program
102 Roadrunner Drive
Sedona, AZ 86336

For questions or more information contact the Community Development Department at 928-282-1154 or ajuhlin@sedonaaz.gov.

Part I: General Information

a) Property Owner Information

Property Address: _____

Property Owner: _____

Mailing Address: _____

Phone: _____ Email: _____

b) Business Information

Business Name: _____

Business Owner: _____

Mailing Address: _____

Phone: _____ Email: _____

c) Has the property received Outdoor Lighting Small Grant Program funding or other funding through a City-sponsored program within the twelve (12) months?

Yes _____ No _____

If yes, what project received funding? _____

Part II: Property Lighting Information

a) Briefly describe the current outdoor lighting on your business, including the date of installation. Please provide documentation that substantiates the date of installation of all light fixtures to be replaced.

- b) Is your business on Highway 89A or Highway 179?
Yes _____ No _____

Part III: Scope of Work

Project Description

- a) Describe the work proposed. Be specific. Indicate the number of light fixtures proposed for replacement and the new types of lights and fixtures proposed. Please attach a cut sheet for each proposed light fixture.

- b) Will the new lighting be visible from the street?
Yes _____ No _____

PART IV: Cost Estimates/Proposals

- a) Cost Estimates/Proposals

Provide **two** original itemized cost estimates/proposals for each light proposed. If a sole source is proposed, only one original cost estimate/proposal is required for that work item. A sole source is applicable when:

- Only one lighting provider is qualified to provide the lights, or if the procurement is of such a specialized nature that only a single source, by virtue of experience, expertise, or proximity could most satisfactorily provide the product or service.

Each cost estimate/proposal shall be itemized, comparable and for the same type of product and/or scope of work. Cost estimates/proposals shall be submitted in the form prescribed by the City. Only original cost estimates/proposals (no copies/faxes) will be accepted. All cost estimates/proposals shall be on the letterhead of the lighting company providing the cost estimate. All cost estimates/proposals shall itemize the scope of installation and must be specific. Cost estimates/proposals shall include light types, fixture types and light cut sheets.

Building permit fees and electrical permit fees, if applicable, are the sole responsibility of the property owner and cannot be included in the project cost submitted to the City of Sedona for matching grant funding.

Cost estimates/proposals submitted as part of this application must be dated within the sixty (60) days prior to the submittal deadline. While this is not intended to serve as a price guarantee for the project, it demonstrates current market values of the lighting proposed. Any price increases above the requested amount are the sole responsibility of the property owner.

b) Lighting Provider

The property owner is encouraged to select a lighting provider who is best qualified to perform the scope of work. The choice of lighting provider is at the sole discretion of the property owner, selection of the lowest price is not required. However, in order to be eligible for matching grant funding, a licensed lighting provider must perform all of the approved scope of work. Should a non-licensed lighting provider perform any of the approved scope of work, the project will be disqualified from receiving matching grant funding.

c) Summary Table

Based on submitted cost estimates/proposals, complete the table below.

Item		Cost Estimate/Proposals	
		Cost Estimate/ Proposal #1	Cost Estimate/ Proposal #2
	Lights, fixtures, and other materials	\$	\$
	Labor	\$	\$
	Sales Tax	\$	\$
	Total amount of Eligible Items	\$	\$
	Requested City Grant	\$	\$
	Property Owner Contribution	\$	\$

Which lighting company/contractor do you anticipate using for this project?

Are you providing a contribution greater than 50% of the project cost?

Yes _____ No _____

If yes, what is the percentage you are contributing? _____

If no, what percentage are you proposing? _____

PART V: Required Supporting Documentation

The property owner is required to submit the following documents as part of the application packet:

- a) Two photographs clearly depicting each light/fixture proposed for replacement.
- b) A site plan that shows the location of property lines and streets, easements, etc. The site plan shall include an outline or “footprint” of all structures on the site as well as driveways, parking areas and landscape areas. The location of the proposed lights/fixtures shall be clearly indicated on the site plan.

PART VI: Certification by Property Owner

I declare that I have reviewed the Outdoor Lighting Small Grant Program Requirements, I understand its contents, and I am submitting this application in accordance with that program. All information submitted is true to the best of my knowledge and belief. I acknowledge that any error may affect the review and approval of this application. I understand that, if I wish to change any aspect of the project after it has been approved (such as choice of lighting providers, number of lights, scope of work), I must first obtain the written consent of the City and may be subject to a new review process. I understand that I am obligated to comply with all requirements described in the Outdoor Lighting Small Grant Program Requirements.

VII. Municipal Support of Dark Skies

- c. City of Sedona "Good Lights...Great Nights" Brochure

OTHER LIGHTS

A partially shielded light fixture may not emit more than 10% of its total light output above the horizontal plane*. Partially shielded light fixtures typically have decorative cutouts, slots or gaps that allow some light to shine above the horizontal plane*. The total number of partially shielded light fixtures per property is limited to a maximum of 5,500 lumens per net acre. However, any single light fixture rated over 2,000 lumens must be fully shielded. The following photographs are examples of partially shielded fixtures.

The City of Sedona encourages you to carefully review your options when purchasing new light fixtures. The concerns of safety, utility and aesthetic appearance need not compete when choosing new fixtures.

LUMENS VS WATTS

Everyone knows that a 100-watt light bulb is brighter than a 60-watt light bulb. However, wattage only measures the power consumption of a light bulb and is not a true representation of the amount of light that is emitted. The City of Sedona uses lumens to determine the amount of light that a fixture emits.

A lumen is a unit used to measure the actual amount of light that is produced by a light source. Manufacturers of light bulbs and fixtures usually provide the amount of lumens produced by their product. Commercial properties are limited to a maximum of 100,000 lumens per net acre. Residential properties have no such limitation.

To find out more information about all lighting codes and requirements, please contact the following Department of Community Development staff members:

Commercial and Residential Lighting

GOOD LIGHTS™

BREEM NIGHTS!

City of Sedona
Department of Community
Development
Current Planning Division
102 Roadrunner Drive
Sedona, AZ 86336

Nighttime lighting is necessary for safety and utility, but common lighting practices can produce unsightly and sometimes dangerous glare, which contributes to the degradation of the nighttime visual environment. Unnecessary light wastes energy and contributes to the loss of the scenic view of the night sky due to increased urban glow.

The intent of the Sedona Outdoor Lighting Code is to maintain Sedona's small town character by minimizing light pollution, light trespass and glare, and to conserve energy while maintaining nighttime safety, utility, security, and productivity.

The Outdoor Lighting Code applies to new construction for both residential and commercial properties. Non-conforming outdoor lights lawfully installed prior to September 26, 2001, may remain in use, except for mercury vapor lights, which cannot be used after July 1, 2006. However, residents and business owners are encouraged to bring all their non-conforming lights into compliance.

This brochure is only intended to provide a brief overview of the type of desired and undesired light fixtures. There are different code requirements for residential lights and for commercial lights. For full details on all Outdoor Lighting Code requirements, please contact the Department of Community Development staff members listed on the back of this brochure.

GOOD LIGHTS

As a general rule, all new exterior lights must be fully shielded; i.e. they only allow light to emit below the horizontal plane*. The following photographs are some examples of light fixtures that are fully shielded and are appropriate for installation for all new outdoor lighting applications.

These fixtures provide enough light for safety and security while significantly reducing or eliminating glare and light pollution, thus protecting the scenic view of the night sky.

Remember

Good lights = Great Nights

BAD LIGHTS

The following photographs are some examples of light fixtures that are no longer allowed by code or are improperly installed.

These fixtures allow light to emit above the horizontal plane* and contribute to glare, light pollution and loss of the scenic view of the night sky.

**The horizontal plane is an imaginary line drawn at the lowest part of the bulb. If light can shine above that imaginary line, then the fixture does not provide proper shielding of the light bulb or the fixture has been installed at an improper angle.*

Sedona, AZ 86336

Dear Mrs. Kendrick:

Larry Anderson supports the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

As a business owner in the community, I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Larry Anderson

Hello, Marc,

It was nice seeing you at the Mary D Fisher Theatre and it was a pleasure meeting your wife.Â I'm sure both of you are happy to have your daughter back from her trip.

I think I mentioned to you that I am on the Board of Keep Sedona Beautiful (KSB) and I am the Chair of the KSB Dark Skies Committee.

Keep Sedona Beautiful is pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association. One of the priorities expressed in the City of Sedonaâ€™s Community Plan update, is the desire of Sedonaâ€™s citizens to â€œsupport community efforts to be dark sky compliantâ€. We believe that the goals and strategies outlined by the International Dark-Sky Association will promote and enhance the efforts of the citizens of Sedona to be good stewards of our dark sky.

Mrs Joanne Kendrick
Chair, Dark-Skies Committee
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

07 August 2013

Dear Joanne

Jasco Home Elements is proud to support the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized as one of the most unique and picturesque locations in the United States and is a destination that attracts visitors from around the world. One of the perhaps surprising features in Sedona is the visibility and brightness of the Milky Way, a spectacular presence that is enjoyed by locals and visitors alike; it is therefore important for this community to protect this increasingly hard to find resource.

As a business owner in the community, we endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Yours sincerely

Jay's Bird Barn comments3 messages

Jay's Bird Barn--Sedona <dena@jaysbirdbarn.com>

Fri, Aug 30, 2013 at 4:35 PM

To: KSB <sedonadarkskies@gmail.com>

To members of the KSB Dark Sky Committee: 8/30/13

Jay's Bird Barn is a strong supporter of designating Sedona as a Dark Sky City.

Many small birds, including warblers, sparrows, vireos, orioles and other insect eating birds migrate at night. Birds use the light from the moon, stars and the setting sun for navigating their way north or south in the spring and fall migration. Artificial lighting interferes with this instinctive behavior. It draws night-migrating birds toward brightly-lit buildings, or street lights or ball fields. This can cause disorientation and disruption of their historic flight patterns. Birds will fly toward the artificial lights and get "trapped" in the ambiance of that light. They will return again and again to the light and hesitate to leave it. Birds also can crash into brightly lit buildings or towers or circle them until they drop from exhaustion, which leaves them vulnerable to predation on the ground. These factors can cause delays in arriving at their breeding grounds which can significantly affect the timing of their reproduction cycle, i.e. securing the best nest sites, the timing of laying eggs to coincide with the height of insect hatching to feed the nestlings. As is evident the ripple effects of obscuring the night skies is endless in the natural world.

For these reasons, Jay's Bird Barn supports low impact lighting solutions which will not obscure our night skies.

Thank you for consideration to these matters,

Dena Greenwood

Manager Jay's Bird Barn Sedona

2360 SR Hwy. 89A

Sedona, AZ 86336

Dear Joanne:

As a resident of Sedona, and a Physician and Medical Director in the community, I fully support the initiative to pursue a Dark-Sky Community designation for the City of Sedona from the International Dark sky Association. It is important for the character of our unique city and environment that our extraordinary views of the night sky be preserved and protected.

Sincerely,

Curtis Kommer, MD
Medical director, Valley Medical Center and Verde Valley Connections Clinic

Dear Dr. Kommer,

Thank you for your email. We would be delighted if you forwarded your endorsement to the membership. We appreciate your assistance, and your letter of support.

On a personal note, my husband and I are eager to start hiking with the Sedona Westerners again!

Best regards,

Sedona, AZ 86336

Dear Mrs. Kendrick:

Las Posadas of Sedona supports the efforts of Keep Sedona Beautiful to obtain a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

The Greater Sedona Area, including the City of Sedona, is recognized worldwide as one of the most unique and picturesque locations in the world. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

As a business owner in the community, we endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Thomas H. Graham

Dear Mrs. Kendrick:

Jan Bigelow supports the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

As a business professional in the community, I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Jan Bigelow

9. Sirius Lookers Astro Club of Sedona

July 20, 2013

Mrs. Joanne Kendrick
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

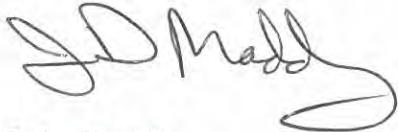

Dear Joanne:

Astronomers of Verde Valley support the efforts of Keep Sedona Beautiful in pursuing a Dark Sky Community designation for Sedona from the International Dark-Sky Association.

Sedona is recognized world-wide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

Astronomers of Verde Valley endorse the application of Keep Sedona Beautiful to have Sedona designated as a Dark Sky Community by the International Dark Sky Association.

Sincerely,

A handwritten signature in black ink, appearing to read "J. D. Maddy". The signature is fluid and cursive, with a large, sweeping loop at the end.

J. D. Maddy
President, Astronomers of Verde Valley

Mrs. Joanne Kendrick
Chair, Dark-Skies Committee
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

Northern Arizona Audubon Society supports the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

It is important for our community that this increasingly rare resource be protected. The over illumination of the night sky causes migratory birds, including endangered species like the Southwest Willow Flycatcher and the Yellow Billed Cuckoo, to become disoriented and exhausted resulting in collisions with night-lit buildings and towers.

As a Non-Profit Organization in the community, we endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Signature: Northern Arizona Audubon Society
Address: P.O.Box 1496
City: Sedona State: AZ Zip: 86339

Please send the letter before August 31, 2013, electronically to SedonaDarkSkies@gmail.com, by mail to Keep Sedona Beautiful, 360 Brewer Road, Sedona, AZ 86336, or by fax to 866-579-6011.

If you have any questions or would like more information, please email SedonaDarkSkies@gmail.com or visit <http://www.keeppedonabeautiful.org/dark-skies>.
Thank you.

Red Rock Rural Community Association

October 20, 2013

LETTER OF SUPPORT

The Officers of the Red Rock Rural Community Association voted unanimously at today's meeting to support the initiative of Keep Sedona Beautiful, Inc.(KSB) to pursue the Dark-Sky Community designation for the city of Sedona from the International Dark-Sky Association (IDA). We recognize that without protective measures a dark sky is a vanishing resource due to increasing light pollution from our fast developing region and support the aims of IDA and KSB to control light pollution. The dark sky of Sedona and the surrounding area that allows us to view the trillions of stars in the Milky Way is an asset treasured by residents and visitors alike.

Sam Braun, President

The Mission of the Red Rock Rural Community Association, LLC, is to maintain the rural lifestyle of the area, to protect Oak Creek riparian area which the state has designated a unique and scenic waterway. We are advocates for responsible development that respects the water supply, the roadways and the scenic beauty of the area.

Sedona, AZ 86336

Dear Mrs. Kendrick:

Rich & Ann Boyer support the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

As homeowners in the community, we endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.'

Sincerely,

Rich & Ann Boyer

Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

Sincerely,

Keep Sedona Beautiful

Dear Joanne,

Thank you for your efforts to have Sedona recognized as a Dark Skies Community. One of the things many Sedona residents enjoy is stargazing from our homes right in town. The views of the stars are unparalleled. It is important to many of us to maintain the dark skies so we can continue to enjoy the clear night sky. Keep up the good work.

Lou and Susanne Nosenzo <lsnosenzo@hotmail.com>

Sat, Aug 31, 2013 at 2:21 PM

To: "SedonaDarkSkies@gmail.com" <sedonadarkskies@gmail.com>

I would like to lend my support to the Keep Sedona Beautiful Initiative to have Sedona designated an International Dark-Sky Community. Many of the residents of Sedona have worked very hard to maintain a dark skies environment in the city. It is unique because of its distance from large cities and other major sources of night light which allows clear views of the heavens and the vast array of celestial bodies both with the naked eye as well as the many privately owned telescopes in the Sedona area. I believe that this unique environment must be preserved and designation of Sedona as an International Dark-Sky Community would help significantly in this effort.

Sedona, AZ 86336

Dear Mrs. Kendrick:

Carolyn & Norris Peterson support the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

As homeowners in the community, we endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Carolyn & Norris Peterson

Dear Joanne

Great initiative! I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as

a Dark Sky Community by the International Dark Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but can be admired

with its detailed structure. The spectacular views of the heavens are enjoyed by both residents

and visitors. It is important for this community that this increasingly rare resource be protected.

Here's our letter supporting the Dark Skies initiative.

All the best,

Nancy

But from the brooding beauty of the night, and daily dancing shafts of golden sun ...

The mystery and wonder of the world ... that play the soundless music of the soul

And fill the heart with memory's olden dreams ... From these will come at last your faith in God.

Max Ehrmann

Dear Homeowners:

Keep Sedona Beautiful is pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association. One of the priorities expressed in the City of Sedona's Community Plan update, is the desire of Sedona's citizens to "support community efforts to be dark sky compliant". We believe that the goals and strategies outlined by the International Dark-Sky Association will promote and enhance the efforts of the citizens of Sedona to be good stewards of our dark sky.

One of the requirements in the application for a Dark-Sky Community designation is to demonstrate support from the community. I respectfully request your consideration of **writing a letter stating you support** the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

For your convenience, a sample letter follows. Please return the letter electronically (SedonaDarkSkies@gmail.com), by mail (Keep Sedona Beautiful, 360 Brewer Road, Sedona, AZ 86336), or by fax (866-579-6011).

We would appreciate your sending us your support letter by August 31, 2013.

If you have any questions, or would like more information, please visit our website at www.KeepSedonaBeautiful.org/DarkSkies or email me at SedonaDarkSkies@gmail.com or call Keep Sedona Beautiful at 928-282-4938. Thank you.

Mrs. Joanne Kendrick
Chair, Dark-Skies Committee
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

I have lived in Sedona over 30 years now, and I am shocked at the increase in the lighting. We use to see stars so brightly at night....

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected from further damage.

Sincerely,

A handwritten signature in cursive script that reads "Nancy Bihler".

Chair, Dark-Skies Committee
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

I am writing this to let you know I whole-heartedly endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association. The beautiful night skies are one of the compelling features of Sedona that drew us here as tourists for 13 years, and to finally move here 7 years ago. The night skies here are as beautiful and exceptional as the day.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

Sedona, AZ 86336

Dear Mrs. Kendrick:

We are VOCA residents as well as KSB members and strongly support the efforts to become designated as a dark sky community by the International Dark-Sky Association (IDA). Sedona is noted for the beautiful red rock scenery during the day as well as the spectacular stars at night.

This designation will serve to assist the area as a tourist destination and will let potential visitors know what experiences await them.

Very truly yours,

Arthur Goodman, Lynn Goodman

Dear Joanne:

I urge you and all of the Keep Sedona Beautiful membership to persist in all activity and public education to have the City of Sedona designated as a Dark- sky Community by the International Dark-Sky Association.

We are truly fortunate to live where the night skies are visible. The spectacular and rare view of the Milky Way is surely our responsibility to protect. We are a destination night sky viewing community with residents who moved here because of this and other pristine and unique natural wonders. It is therefore essential that we do all we can to be good stewards of this truly spectacular night sky panorama as Sedona residents.

Regards,

Donna Michaels

Support for Dark Skies initiative to Keep Sedona Beautiful2 messages

MAR <martyrud@bellsouth.net>
To: SedonaDarkSkies@gmail.com

Fri, Aug 16, 2013 at 7:47 PM

Mrs. Joanne Kendrick
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Mrs. Kendrick,

We are very supportive of efforts by Keep Sedona Beautiful in many aspects. An important program worthy of acceleration and expansion is the pursuit of a Dark Sky Community designation for the greater Sedona area, including the Village of Oak Creek. As a significant community near the telescopes in Flagstaff (which is already designated as a Dark Sky Community), and as one of the few populated areas of the United States in which it is feasible to achieve Dark Sky status and the associated benefits of viewing more of the stars in the sky, we think that Sedona should aggressively pursue the conversion of lighting to be Dark Sky compliant. The designation of the area as a Dark Sky Community should help to accelerate that process.

The Keep Sedona Beautiful efforts in this regard could extend to actively addressing and guiding the maintenance personnel, operators, and owners of businesses and public and semi-public facilities. As a new homeowner in the Village of Oak Creek, we see, for example, opportunities to replace horizontal-glaring lights mounted on buildings and condos immediately surrounding the golf course. Many businesses in the area also still have lighting that is inconsistent with Dark Sky needs. By actively addressing these conditions, and developing low cost ways for the owners and businesses to convert their lighting to be Dark Sky compliant (such as serving as an organizer and conduit for group/bulk purchases of compliant light fixtures and electricians' services), the Keep Sedona Beautiful organization can take this effort to a new level.

We wholeheartedly endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark Sky Community by the International Dark Sky Association, and encourage you to include associated areas outside of the city limits such as the Village of Oak Creek.

Sincerely,

Martin and Caroline Rudat

Efforts to Make Sedona a Dark Sky Community3 messages

Jacqueline Vaughn <jacquelinevaughn@gmail.com>

Sun, Oct 13, 2013 at 5:26 PM

To: SedonaDarkSkies@gmail.com

Dear Joanne,

I am delighted to read about the efforts of KSB to embark upon the process of having Sedona designated as a Dark Sky community. Having moved to the Village of Oak Creek from Flagstaff, I know how important such a designation can be to an area. The Dark Sky designation now is being recognized around the world as evidence of a community's commitment to maintaining an environment that is free from the kind of light pollution that has spoiled the views of the night skies for billions of people on Earth. Children who live in cities where visibility is diminished by lighting will never have the opportunity to see the constellations and stars of the Milky Way, nor view a planet with the naked eye. Dark skies are a resource we cannot afford to lose, and once lost, those skies are irreplaceable.

I commend you and Keep Sedona Beautiful for working on our behalf.

Joanne,

You are most welcome.

We're new Sedona residents - having just moved into our beautiful home from San Antonio one month ago - and one of the most stand outs was the Milky Way!

We're so happy to read there is an initiative to keep the stars close to us!

Please let us know if we can help in any way.

Welcome to Arizona! My husband and I moved to Sedona about three years ago from Dallas. Jerry and I are native Texans and have been coming to Sedona for about 20 years. It was an easy decision to retire in such a beautiful place with the Milky Way to view nightly! Coming from Dallas, we never saw the Milky Way unless we took a long journey!

Keep Sedona Beautiful is doing some wonderful things to preserve the beauty of Sedona! Thanks again for your enthusiasm to protect our beautiful night sky!

Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

I, Natalie Gilbert, wholeheartedly endorse the efforts of Keep Sedona Beautiful to have the International Dark Sky Community designate the City of Sedona as a Dark-Sky Association.

Visitors from around the globe are attracted to Sedona's unique and rare beauty, and the two key elements of this beauty are Sedona's majestic red rocks and starry night sky. Sedona is one of the few locations in the United States where the heavens can be clearly viewed without a telescope. Both visitors and residents recognize the fragility and rareness of Sedona's natural treasures. In return for the joy and prosperity that Sedona's red rocks and night sky have provided for its leaders, communities, and visitors, it is our responsibility to protect these resources.

I ask you to please consider the request of Keep Sedona Beautiful. I have volunteered for this dedicated organization, and I know how tirelessly the members of KSB work to preserve all the resources that make Sedona what it is.

Sincerely,

A handwritten signature in cursive script that reads "Natalie J. Gilbert". The signature is written in dark ink and is positioned above the printed name.

Sedona, AZ 86336

Dear Joanne:

I have had the pleasure of visiting Sedona at least 45 times over the last 15 years. Like the other many visitors to your spectacular part of the world, I am in awe of the majestic Red Rocks and the breathtaking dark skies.

I understand that Keep Sedona Beautiful is now working to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association. How wonderful! I wholeheartedly applaud your efforts to preserve this vanishing wonder of the world — star-filled nights. Almost every evening at my home in a suburb just north of Dallas, I gaze up at the heavens, wishing that I could see the Milky Way. Unfortunately, because of light pollution, I can't. But thanks to the efforts of Keep Sedona Beautiful, I now have the assurance that the dark skies of Sedona will be preserved — an incomparable treasure for me and the thousands of other visitors who come to your part of the world every year.

As of course you know, apart from the simple pleasure of gazing into the infinity of the heavens, there are other reasons for preserving the dark skies. Human-produced light pollution caused by poor lighting threatens astronomy, disrupts ecosystems, affects human circadian rhythms, and wastes billions of dollars of energy. Hopefully other villages, towns and cities across the globe will follow in your footsteps and work toward preserving dark skies in their communities as well.

I wish for you and all those involved wonderful success in having the City of Sedona designated as a Dark-Sky Community. This is good for the environment, good for tourism, and good for the well being of all!

With warm regards,

Jacqueline Grote

Dear Joanne:

I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

Sincerely,

Marybeth Max

Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

As a frequent visitor to Sedona, I want to express my support to have the City of Sedona designated a Dark-Sky Community by the International Dark Sky Association.

Sedona has a well deserved reputation as a beautiful place to visit, experience the red rocks and unusual natural sites.

Most appealing to me are the rare dark skies of Sedona that allow the stars to seemingly touch the earth...inspiring and magnificent! I really look forward to seeing them again on my next visit with friends this October.

Thank you for all the work you and your organization does to protect the wonder of Sedona.

Sincerely,

Eileen Tanne

Dear Mrs. Kendrick:

Heather Hermen supports the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

I fully endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Heather Hermen

30 Rock Top Road

Sedona, AZ 86351

Georgia,

I was going to do a little research on this before responding but I happened to have a Sky Mountain Ranch HOA board meeting today and asked my fellow board member, Norris Peterson, about this. Since I respect his opinion, which was positive about your request, please accept this note as permission to use our names.

Denis O'sullivan

Sedona, AZ 86336

Dear Mrs. Kendrick:

Michelle and Gerry Snyder support the efforts of Keep Sedona Beautiful in pursuing a Dark-Sky Community designation for the City of Sedona from the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

As members of Keep Sedona Beautiful, we fully endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sincerely,

Michelle and Gerry Snyder

Joanne Kendrick
Chair, Dark Skies Committee
KSB
360 Brewer Rd.
Sedona, AZ 86336

Dear Joanne,

We wish to express our strong support to have the City of Sedona designated as a Dark Sky Community. The night sky in Sedona is still clear and beautiful (depending upon weather of course). The City has complied with their own guidelines of using lighting only where it is needed for safety while minimizing impact on the night sky. The recent debate about installing lighting along Hwy 89A is over; and we see now that the lighting selected by ADOT is well-focused on the roadway itself with minimal impact upon the night sky.

We would take much pride in being designated a Dark Sky Community!

Thank you,

Norm and Jane Hanson
75 Cimarron Ridge Dr.

Dear Georgia:

I just learned about your effort with Keep Sedona Beautiful to secure dark sky designation. Feel free to add my name if it is helpful. My visit to Sedona was magnificent, and as growth occurs, it will be even more important to retain a dark night sky. Thanks for all your efforts in this regard!

All the best,
Stephanie

- 3. Areas Surveyed**

b. i. Survey Conducted by Keep Sedona Beautiful Volunteers in 2012/2013 and Results

Survey by Keep Sedona Beautiful Volunteers of Business Lighting in Sedona: Uptown and Along State Route 179

Survey Period: 2012 / 2013

Purpose: Identify businesses with lighting not compliant with the City of Sedona's Outdoor Lighting Ordinance. The survey results are forwarded to the City, which is to advise the businesses of the fact that their lighting is not compliant and if grandfathered, that they can apply to the City for cost-sharing in retrofitting the lighting to compliant fixtures.

All businesses, except for those inside the Tlaquepaque shopping area, were surveyed for use of lighting not compliant with the City Outdoor Lighting Ordinance. For each business found to have non-compliant lighting, a form was completed describing the problem(s) and photos were taken of the offending fixture. The surveys were conducted by a team of two volunteers for each assigned area.

Results:

More than fifty businesses with non-compliant lighting were identified.

The City will contact the businesses and distribute grant applications to them.

1. Areas Surveyed – Sedona City Light Survey

Sedona City Light Survey

Updated: Oct30, 2013

Area	Description	Surveyor(s)	Status
1	East side of 89A, north of Amara, plus any businesses/lights in the Canyon Breeze Center that we did not document during our training session (continuing and finishing east side of 89A)	Birgit Loewenstein & Jim Molans	Complete

**INTERNATIONAL DARK-SKY ASSOCIATION APPLICATION
KEEP SEDONA BEAUTIFUL, INC.
NOVEMBER 2, 2013**

ADDENDUM

State Route 89A Continuous Roadway Lighting Project and the Dark-Sky Community Designation

Introduction

History plays an important role when discussing the Arizona Department of Transportation (ADOT) State Highway 89A lighting project and how the citizens of Sedona care about their environment.

The citizens of Sedona founded Keep Sedona Beautiful (KSB) in 1972 due to increasing growth and lack of long-term planning on the part of Yavapai and Coconino counties. In the beginning KSB concentrated on community improvement through its now 41-year volunteer litter-lifters program and gaining control of the uncontrolled proliferation of signage in the region. Over time Sedona citizens saw the need to be proactive on issues such as preservation of the National Forest that surrounds Sedona, water quality and dark-skies.

Over the years the City of Sedona, residents and KSB have had successes in preserving the environment we cherish. These include 1) the preservation of our national forests through an amendment to the forest service plan to restrict land trades; 2) designation of Oak Creek as a Unique Arizona Waterway; 3) design and implementation of the current City of Sedona outdoor lighting ordinance; 4) a grassroots effort to challenge the Arizona Department of Transportation on the redesign of State Highway 179 resulting in a design that included dark-sky compliant lighting and a roadway designated as an All American Road and Scenic Byway; and 5) numerous environmental issues including watershed protection and community planning.

Stewardship of Sedona's lands, air, dark-skies and natural resources is a priority of the region's residents. This is our history and will continue to play a defining role into the future.

When ADOT proposed continuous roadway lighting (CRL) along Arizona State Highway 89A in West Sedona the city, residents and community groups had just concluded a multi-year effort to change ADOT's proposed redesign to Arizona State Highway 179. Prior to that the community completed a route transfer with ADOT of Arizona State Highway 89A in the uptown area which was also a highly debated issue.

ADOT is a state agency with a history of doing standardized projects in order to keep their construction costs lower. Through the efforts of Sedona community residents ADOT acknowledged that it had to change the way they did public outreach in our community during the Highway 179 project. The result is a roadway that fit our community needs, was dark-sky compliant and made a significant change in how the ADOT public outreach process is done throughout Arizona.

Arizona State Highway 89A in West Sedona

State Route 89A is the main thoroughfare through West Sedona. Between 2000 and 2006 four fatal pedestrian/car accidents occurred at night on this road. The AZ Department of

Transportation (ADOT), the government entity responsible and liable for safety on the road, conducted a Pedestrian Crossing Study on 89A. In 2007 ADOT recommended continuous roadway lighting on 2 miles of 89A even though three of the accidents had occurred under similar circumstances at one particular intersection – Andante/89A -- and the fourth one at a location outside the proposed CRL area.

Thus began a 6-year community discussion over the CRL Project. When ADOT proposed CRL along the highway there was immediate community concern about impacts to the region's dark skies.

Many individuals in the community and several civic organizations – KSB among them -- had for many years worked diligently with the City towards obtaining a Dark-Sky Community designation for Sedona from the IDA. They opposed CRL because of fear it would degrade the beautifully dark Sedona night sky and jeopardize award of the coveted designation. They and others also were concerned that CRL would do little to increase the road's night-time safety and nothing to increase its daytime safety (many more accidents occur on that stretch of road during daytime than at night).

They thus favored installing a traffic signal and road lights at the Andante/89A intersection, and not CRL. Frustrated by ADOT's continued insistence of CRL, Dark-Sky advocates and the City Council of 2011 even went so far as to advocate acceptance of ADOT's final proposal that the City take ownership of the relevant stretch of SR89A, so that the City would have authority -- but also financial responsibility and liability -- over the road. City Council voted 4:3 in favor of 89A transfer in April 11, 2011.

Opponents of the transfer organized then to reverse that decision and let the people decide with a referendum. A discussion that had been about protecting our night skies now became a discussion on liability, financial consequences, increased taxes and how the route transfer would impact other city projects.

This all took place as the nation's economy had just gone through a protracted economic recession. Our nation and community were slowly coming back from this recession during the community debate on the route transfer. The Special Election was held Nov 8, 2011. With a voter turnout of 68%, the result was 70% against 89A takeover, 30% for. With that, ADOT retained ownership of 89A and installed CRL. The lights were turned on in October 2012.

The Silver Lining

The silver lining? Due to the citizens' voicing their concerns against the CRL, the lights are Dark-Sky compliant, IDA-approved fixtures (IDA's second-best choice) with full cut-off, flat lens, 200 W HP sodium bulbs, no skyward spillage, no lateral glare. The lights originally proposed by ADOT would have been its standard highway lighting with cobra head fixture, 250 W HP sodium bulbs, generating 860,000 lumens direct spillage for the 2-mile CRL!

Actual Effect of the CRL on Sedona's Night-Sky Brightness

The unknown of the CRL project lay in what effect, in hard numbers, the CRL would have on Sedona's night sky. With the CRL in operation, these hard numbers are now available thanks to the careful study by Eric R. Craine et al., originally suggested by IDA-Board member Chris Monard: *The Sedona 89-A Roadway Lighting Project: Dark Skies and Astronomy in Northern Arizona*. Proc. 32nd Ann Mtg. Soc. Astron. Sci. (ed, Warner, Buchheim, Foote, and Mais). The authors measured night-sky brightness with mobile ground-based (car-mounted) and airborne (plane-mounted) photometric instrumentation along the length of the CRL directly along 89-A and at increasing distance perpendicularly to (north and south of) 89-A, before and after the CRL installation. The results of these highly sophisticated measurements show that although road illumination increased 33-fold, there is no statistically significant effect of the CRL on night-sky light level even just one block away from 89-A.

Moving on Beyond the CRL to the Dark-Sky Community Designation

The decision on whether Sedona deserves the Dark-Sky Community designation lies with the IDA and only the IDA. KSB hopes the IDA Review Committee will weigh the extraordinary effort by the community to prevent the CRL over a length of road neither owned nor controlled by the City (in the end coming away with dark-sky compliant lighting fixtures instead of light-polluting standard fixtures), and also recognize that in tying CRL to the road transfer the focus was shifted away from just CRL to financial and liability consequences, plans to redesign the whole road for general, not just night-time safety, and possible years of road construction with negative impact on businesses along the road during that period. The Special Election was a vote on road ownership transfer, not on CRL.

Sedona residents and businesses have a long history of stewardship and working towards solutions that are environmentally sound. KSB is of the firm conviction that a Dark-Sky Community designation by the IDA for Sedona will result in renewed efforts to control light pollution and because the designation is highly coveted, will provide a powerful incentive if not tool to prevent future excessive lighting projects.

Abstract

In the latter half of 2012 the Arizona Department of Transportation completed installation of a roadway lighting upgrade on Highway 89-A in West Sedona, Arizona. This project was controversial in part because of the desire of many local residents to preserve the dark sky environment of the community. The project was delayed due to contentious arguments between environmental and development advocates. This project thus presented an interesting opportunity to test the issues of lighting project impacts on sky brightness by making quantitative photometric measurements of the community before and after the lighting installation. The authors incorporated this opportunity into the existing Light at Night Mapping Program as a third distinct Arizona community: LAN MAP 3. In this paper we report some of the preliminary findings of this study.

1. Introduction

State Highway 89-A runs east-west through parts of Sedona, Arizona. After a series of pedestrian fatalities the Arizona Department of Transportation (ADOT) conducted safety studies at the request of the City of Sedona. ADOT concluded that the insufficient lighting of the roadway was one of the primary causes of the accidents.

Joining with the Federal Highway Administration (FHWA), ADOT proposed a project to install new lighting fixtures to combat the accidents on this stretch of highway. The project was proposed in 2006; almost immediately there was concern from portions of the community.

Numerous residents and groups in Sedona questioned the necessity of new installations and contended that ADOT's lighting plan did not sufficiently address issues of impacts on sky

brightness. Of particular concern was ADOT's proposed use of continuous roadway lighting (CRL). The area in which the new lighting system would be installed is on a scenic route and could potentially adversely affect the possibility of being categorized a dark sky community.

The issue of installing lighting fixtures quickly became a community wide political debate. City council candidates often included lighting, or non-lighting, as a part of their campaign or term issues. In 2011 Proposition 410 was put to a vote, determining whether an earlier vote by the City Council to take over control and responsibility for the stretch of highway should be upheld. While this proposal would have allowed Sedona to control any new lighting installations, it would also require the city to take on the financial obligations for the maintenance of the roadway. Proposition 410 was defeated, and control of the highway and lighting plans remained with ADOT.

Ultimately 108 new lighting fixtures were installed on a two mile stretch of the highway. They were activated in October of 2012, after a costly delay of over six years.

In reviewing the history of this project one is struck by two observations: 1) most of the resistance to the project emerged from, or was spurred by, groups advocating for protection of dark skies, and 2) the public arguments advanced both for and against the project were singularly devoid of any quantitative data, relying wholly on anecdotal and emotional appeal.

It was brought to the attention of the authors of this paper that this project offered a unique and timely opportunity to objectively test the claims of the protagonists, and to quantitatively determine the real effects that would accrue to sky brightness.

This was of particular interest since the surrounding area of northern Arizona hosts numerous extant and planned astronomical observatories. There was a fear that these observatories might be in jeopardy as a result of light pollution from the proposed project.

In this paper we summarize the protocols that were employed to measure effects of the actual lighting project; we discuss the data reduction, and describe the outcomes. We conclude with a summary of lessons that can be learned from this type of development and what they might mean for the astronomical community.

2. Background to LAN MAP 3

STEM Laboratory, Inc. of Tucson, Arizona (STEM) has for several years engaged in development of specialized photometric systems and

their application to measuring sky brightness and general light at night (LAN). Several relevant protocols have been developed, including ground mobile surveys (GMS), ground static surveys (GSS), and airborne surveys (ABS), all discussed in detail in the literature [Craine et al 2011a; Craine and Craine 2011].

Various combinations of these protocols have been used in recent years to conduct sky brightness and LAN surveys in areas where light pollution could negatively impact astronomical observatories. The first of these surveys was LAN MAP 1 [Craine et al. 2012], which involved GMS, GSS, and ABS surveys of 1,000 square miles centered on Tucson, Arizona. The second, LAN MAP 2, surveys an area of about 900 square miles around Sierra Vista, Arizona. The Sedona 89-A project has led to implementation of LAN MAP 3, a very compact GMS and ABS data collection project of about 25 square miles centered on West Sedona, Arizona.

In each case the protocol consists of collecting a baseline set of data, using techniques that are appropriate to the region surveyed, and then conducting one or more identical (or near identical) follow-up surveys at a later date. The data analysis involves examination of changes in light levels and patterns between baseline and successive surveys.

3. Instrumentation

Three STEM photometers were used in the collection of LAN MAP 3 data; one for the GMS program and two for the ABS program. We describe each of these devices as follows.

3.1 Ground Mobile Survey (GMS)

Instrumentation

SBM Model 4

The workhorse GMS photometer used for two years now by STEM Laboratory, Inc. is the Sky Brightness Monitor (SBM) Model 4. This unit uses a single light-to-frequency silicon photodiode detector. In its stock form it is optically filtered with an IRC-20 infrared cut filter (Sunex). The unit operates with an integrated GPS module which is polled every two seconds to yield date, time, geographic coordinates, and altitude. The GPS output is a standard National Marine Electronics Association (NMEA) GPS data suite (c.f. SIRF 2005 and NMEA 2011). Simultaneously, the photodiode is sampled for light intensity (mag/arcsec^2 and cd/m^2). These quantities are coordinated in the onboard microcontroller and written to an onboard micro-SD card writer. From this they can be transferred to a project data analysis

computer upon completion of the data collection flight.

3.2 Airborne Survey (ABS) Instrumentation

LANM Model 5

The Light at Night Monitor (LANM) Model 5, is built on the same platform as the SBM Model 4, but has two of the silicon photodiode detectors that are read simultaneously. The GPS data polled are the same as the SBM Model 4, with the exception of the inclusion of the speed of the vehicle carrying the LANM Model 5. Also, there are two channels of photometric data rather than just one. The optical filtration is generally an IRC-20 infrared cut filter; otherwise the spectral response is that of the silicon photodiode.

Another distinguishing feature of the LANM Model 5 is that the two photodiodes are aligned with a separation of 180° on the optical axis, ensuring that they are looking in opposite directions. For purposes of airborne operations this ideally results in one detector looking at the zenith and the other simultaneously observing the nadir. The LANM Model 5, operated in airborne mode, provides a good contrast between sky brightness overhead, and the distribution of light intensity on the ground that is scattered upward to contribute to sky brightness.

LANM Model 6

The LANM Model 6 is electronically identical to the LANM Model 5. The distinguishing feature of the LANM Model 6 is that the two detectors are aligned to look simultaneously at the same target field, and the optical filtration is different from the other units. We are using the LANM Model 6 as a custom system where we can insert specific optical filters of interest. Our early work involved two filter combinations: 1) IRC-21 infrared cut + Wratten 47 and 2) IRC-21 infrared cut + Wratten 58; yielding blue (B) and visual (V) band data for each scene. The LANM Model 6 is thus most useful for defining a color (such as B-V) for a relatively bright area (since the introduction of additional optical filters reduces the sensitivity of the photometric system).

4. Data Collection

Data collection for LAN MAP 3 involved several trips to Sedona. Two trips were made to visually survey the area, make preliminary photographs, and prepare plans for an instrumented, nighttime ground mobile survey and simultaneous airborne survey. Data were then collected on two primary nights of GMS and ABS work. The baseline surveys were conducted on 14 May 2012. The

follow-up surveys on 6 November 2012, after the lights had been installed and made operational. Two additional trips were made to collect follow-up photography and to explore some of the areas noted to contribute to high night sky brightness in the area.

Both survey sessions followed the same protocols. The GMS was initiated shortly after the ABS team was airborne, an event timed to occur at or shortly after astronomical twilight. The GMS team drove a prescribed street pattern in West Sedona that included Airport Road, a four mile stretch of 89-A, and a couple of blocks both north and south of 89-A on five major cross streets.

The ABS team (aboard the LAN MAP Project Cessna 182Q aircraft) initiated its flight operations in Tucson, AZ and flew directly to Sedona Airport, where they landed. At Sedona Airport, the photometers (both LANM Model 5 and 6) were installed and tested after sunset. The data collection flights commenced about astronomical twilight and continued for about an hour while flying a grid over the West Sedona target area. Upon completion of the grid, the ABS team remained airborne and returned directly to Tucson. All of the photometers remained active for the duration of the return flight, yielding a sky brightness and LAN profile of a path nearly the full length of the state of Arizona.

The pattern driven for the GMS, using the SBM Model 4, is shown in Figure 1. The generally east-west path coincides with Highway 89-A. The generally north-south segments are major cross streets along the way. A typical ground track grid for the ABS is shown in Figure 2.

Data products for both surveys consisted of text files containing continuous streams of sensor positions and photometric brightness. In each case data points were recorded every 3-8 seconds.

Upon return to Tucson, all of the data files were downloaded and archived in our Sky Brightness Data Archive (SBDA) [Craine et al. 2011b] for subsequent processing.

Figure 1. This satellite image of West Sedona, AZ shows, in red, the ground track of the GMS.

Figure 2. This satellite image of West Sedona, AZ shows, in red, the ground track of the ABS.

5. Data Reduction and Analysis

5.1 Ground Mobile Survey

The GMS data in the SBDA were loaded into a MicrosoftTM Excel spreadsheet, where they could be conveniently manipulated. The data were sorted on both latitude and longitude from which they could be easily parsed into coherent subsets. Each data subset could be easily ordered to represent sky brightness above select segments of roadway. Thus we created sky brightness segments along Highway 89-A, as well as each of the five cross streets that were measured.

It should be appreciated that these sky brightness measures are actually zenith brightness as seen from about walking eye level and thus can include direct street lighting as well as background sky brightness, depending on the ground coordinates of the measured point of interest.

Figure 3. This is a plot of sky brightness as a function of latitude along the length of Dry Creek Road, running roughly perpendicular to Hwy 89-A. The data were collected on the evening of 05/14/12 (05/15UT). The bright peak is the intersection with 89-A.

An example of the result for one of the cross streets is shown in Figure 3.

Before and after ADOT project lighting installation sky brightness tracks along the length of Highway 89-A are shown in Figures 4 and 5.

Figure 4. This is a plot of sky brightness as a function of longitude along the length of Highway 89-A made on the evening of 05/14/12 (05/15UT). The bright points are overhead streetlights; the peaks are at major intersections. Note the general low levels of lighting along most of the roadway.

Figure 5. This is a plot of sky brightness as a function of longitude along the length of Highway 89-A made on the evening of 11/06/12 (11/07UT). It is apparent where the new streetlights have been installed (compare with Figure 4).

The five cross-street data segments were each parsed into three sub-segments, an intersection data set (represented by the peak in Figure 3), and a north and south segment, each extending typically to two or four blocks away from Highway 89-A (the “wings” in Figure 3). We then compared the mean brightness of each of the north and south segments before and after installation of the new street lights.

This comparison was done in the form of a standard two-sample t-test to evaluate the hypothesis

that the mean sky brightness over each roadway segment was identical (i.e. unchanged by the lighting installation).

For the ten cross-road segments we show in Table 1 the results of the t-test. The segments are identified in columns 1 and 2. The mean sky brightness from the follow-up survey are in column 3, and the standard deviation of the means are in column 4. The P-value generated by the t-test is in column 5. We will interpret these data by applying a traditional 95% minimum confidence level.

Leg	N/S*	Mean (mag/arcsec ²)	stdev†	P
1	S	21.14	0.21	0.901
1	N	21.32	0.13	0.558
2	S	20.88	0.34	0.701
2	N	19.67	1.08	0.554
3	S	20.99	0.16	0.741
3	N	21.00	0.26	0.409
4	S	20.99	0.20	0.652
4	N	21.16	0.10	0.083
5	S	21.36	0.06	0.476
5	N	20.92	0.10	0.661

*N, is north. S, is south

†stdev, is standard deviation

Table 1. Two-sample t-test results for comparison of the ten cross road segments before and after lighting installation.

For the highway 89-A segment, we calculated the mean sky brightness before and after lighting installation. These calculations were performed for the roadway segment between longitudes -111.781° and -111.816° , which is the region in which new lights were installed. These calculations indicated that roadway lighting levels were increased by a factor of 33.1.

5.2 Airborne Survey

Similar to the GMS data, the ABS data in the SBDA were loaded into a MicrosoftTM Excel spreadsheet, where they were parsed for analysis. The data were sorted to ensure that we isolated those data points obtained in the immediate Sedona survey area. We also parsed the data by altitude to ensure that we only used those data that were part of the desired grid, not obtained during climbing or descending phases of the flight.

The remaining data were converted to text files that served as input to isophotal mapping software as well as Geographic Information Systems (GIS) software. For this purpose we used various combinations of EarthPlot, QuikGrid, and Google Earth.

Isophotal maps of sky brightness over West Sedona are shown in Figures 6 and 7.

Figure 6. Sky brightness map over West Sedona as obtained on 05/14/2012.

We have parsed the ABS data into two adjacent areas as shown in Figure 8. The lower rectangular area is fairly equally bisected by Highway 89-A; the upper region is of the same size and is used as a control data set.

For both of these regions we performed statistical hypothesis testing to evaluate the possibility that the lighting project significantly changed the local sky brightness.

Figure 7. Sky brightness map over West Sedona as obtained on 11/06/2012.

Figure 8. Test and control regions of the West Sedona sky brightness survey. The control is Region A to the north; the test is Region B over 89-A.

In Table 2 we show the results of the comparison of the two regions. Column 2 is the mean sky brightness in mag/arcsec² prior to lighting installation; column 3 is similar data after lighting installation. Column 4 is the P-value generated by the t-test, which we will later interpret at the minimum confidence level of 95%.

Grid	Pre Project	Post Project	P
Control	21.7	21.7	0.384
89A	21.7	21.8	0.235

Table 2. Two-sample t-test results for comparison of the test and control regions before and after lighting installation.

6. Conclusions

For the off-intersection, cross road data, at the 95% minimum confidence level, we cannot reject the hypothesis that the sky brightness before and after the installation of continuous roadway lighting remains the same. This result is statistically significant for each of the 10 side streets that we measured.

For the length of the main Highway 89-A roadway that was illuminated with new continuous roadway lighting (CRL) installations, we find the following:

- The roadway level illumination is on average about 33.1 times brighter after the new CRL than before.
- The new roadway lighting on average shows more uniform lighting along the length of the road than did the previous lighting.

The West Sedona airborne data indicate the following:

- The region surveyed is very uniform in sky brightness, with a couple of notable exceptions that are unrelated to the 89-A lighting project.
- Comparison of before and after the CRL project sky brightness data directly above 89-A indicate that, at the 95% minimum confidence level, we cannot reject the hypothesis that the sky brightness before and after the installation of continuous roadway lighting remains the same.
- Comparison of before and after the CRL project sky brightness data directly above a region directly adjacent to 89-A indicate that, at the 95% confidence level, we cannot reject the hypothesis that there is no difference in sky brightness before and after the installation of continuous roadway lighting.

In summary,

- The 89-A CRL project appears to have successfully implemented its lighting goals.
- The 89-A CRL project has made use of well-directed and well shielded lighting fixtures that

appear to have had no or minimal negative environmental impact.

- The 89-A CRL project appears to have successfully preserved dark skies over Sedona, and indeed shows no statistically significant evidence of any change in sky brightness.
- In retrospect, criticism by environmental, sky brightness advocacy, and anti-development groups were based largely on erroneous anecdotal “information”, with a notable dearth of quantitative data. Actions by these groups substantially delayed the project, contributed to significant increases in costs to the Arizona taxpayers, and generated unnecessary ill will between various elements of the community.
- Future projects would potentially benefit from the application of quantitative measurements of lighting impacts before and after the project is undertaken.

It appears from this study that the postulated threat to astronomical facilities in northern Arizona was greatly overstated. It also appears that a thoughtful effort was made to install well designed lighting that would fulfill a need while minimizing recognized potential negative impacts.

Astronomers are clearly right to feel great sensitivity to issues of light at night. It is important to the success of their endeavors that they protect dark night skies. Generating unnecessary ill will does not benefit their cause; taking a “cry wolf” approach to all lighting projects can ultimately damage their credibility.

It could benefit all astronomers if they were to recognize and applaud good lighting projects, such as the one studied here, as energetically as some oppose the bad.

7. Acknowledgements

The LAN MAP 3 project has been internally supported by a collaborative agreement between STEM Laboratory, Inc. and Western Research Company, Inc., both of Tucson, Arizona. We appreciate the help of Ed Tuohy for mechanical assistance with one of the airplanes used in the data collection. We appreciate the cooperation of Mr. Bill Pederson of ADOT, and relevant discussions with Dr. David Crawford, F.I.E.S. Air Traffic Control operators at Phoenix Sky Harbor were extremely cooperative in assisting with our requirements for these flights, which we deeply appreciate. The opportunity to conduct this study was brought to our attention by Mr. Chris Monrad of Monrad Engineering, Inc., Tucson, AZ.

b. i. Survey Conducted by Keep Sedona Beautiful Volunteers in 2012/2013 and Results

Survey by Keep Sedona Beautiful Volunteers of Business Lighting in Sedona: Uptown and Along State Route 179

Survey Period: 2012 / 2013

Purpose: Identify businesses with lighting not compliant with the City of Sedona's Outdoor Lighting Ordinance. The survey results are forwarded to the City, which is to advise the businesses of the fact that their lighting is not compliant and if grandfathered, that they can apply to the City for cost-sharing in retrofitting the lighting to compliant fixtures.

All businesses, except for those inside the Tlaquepaque shopping area, were surveyed for use of lighting not compliant with the City Outdoor Lighting Ordinance. For each business found to have non-compliant lighting, a form was completed describing the problem(s) and photos were taken of the offending fixture. The surveys were conducted by a team of two volunteers for each assigned area.

Results:

More than fifty businesses with non-compliant lighting were identified.

The City will contact the businesses and distribute grant applications to them.

XII. Success in Light Pollution Control

IDA Requirement:

E) Success in light pollution control. At least one of the following conditions must be demonstrated:

- i) Examples of a minimum of ten projects built under the lighting code, demonstrating effective application of the local lighting code, AND/OR;**
- ii) Alternative demonstration of success in light pollution control**

Sedona:

Content:

a. As required in section E i) above, the City has achieved real success in implementing dark skies standards. The response to the City lighting code from Builders has been positive. While new building construction has been quite modest over the past several years, the City has succeeded in implementing the code and associated dark skies requirements in twenty-eight projects. The following chart outlines these projects.

The following information details all new construction and building additions within the City of Sedona since the establishment of the City of Sedona Outdoor Lighting Ordinance (Dark Sky). All of these projects were required to comply with the Outdoor Lighting Ordinance.

From January 2002 until the end of August 2013, the following single-family houses and multi-family new construction projects were completed:

Single-family (including manufactured and factory built houses) 557
Multi-family and attached single family projects 29

The following table lists 29 non-residential (commercial, lodging and timeshare) new construction projects and additions since January, 2002.

Name of Project	City reference number & year	Type of construction
Arroyo Roble Village Shops,	DEV2002-14	New commercial building
Bank One	DEV2002-10	New commercial building
Legacy Plaza	ZC2003-2 and DEV2003-4	New commercial building within existing development
Serge Wright Offices	DEV2002-15	New commercial building within existing development
Sedona Summit Resort Phase 4	DEV2002-13	Time share resort expansion with new buildings within an existing development
Jewish Community of Sedona	DEV2001-1 and CUP2001-3	New commercial building
Piedras Del Rojo	SUB2003-6 and DEV2003-7	New multi-family development
Sun Building	DEV2003-9	New commercial building
Arroyo Pinon Condominiums	SUB2004-6 and DEV2004-7	New multi-family development
Artz 'N' 1	ZC2004-2 and DEV2004-2	Rehabilitation and expansion of a commercial development
Sedona Humane Society	DEV2004-4	New commercial building

City of Sedona – Construction projects from January 2002 through August 2013

Created 9/5/2013

Tiaquepaque – Patio del Norte	DEV2004-6	Expansion of a commercial development
Boots and Saddles Bed and Breakfast Addition	DEV2005-4	Expansion of an existing bed and breakfast development
Eagle Cliff Business Park	DEV2005-3	New commercial building
Pine Terrace Condominiums	SUB2005-9 and DEV2005-8	Rehabilitation of an existing multi-family development
Sedona Real Inn Phase II	ZC2005-4 and DEV2005-7	Lodging expansion with new buildings within an existing development
Sedona Summit Unit II, Phase 5	DEV2005-13	Time share resort expansion with new buildings within existing development
View Plaza	SUB2005-15 and DEV2005-11	New commercial building
Amara Resort Spa	ZC2006-1 and DEV2006-4	New commercial building within existing development
Church of the Red Rocks Addition	DEV2006-10 and CUP2006-3	Addition to an existing development
Harry Christie Project	ZC2006-2 and DEV2006-5	New commercial building and multi-family mixed use development
La Tierra Plaza and The Adobe Lodge	ZC2006-4 and DEV2006-8	New commercial building within existing development
Lumbermens	DEV2006-13	New commercial building
Park Place	DEV2006-3, SUB2006-3	New multi-family development
Soldiers Pass Plaza	DEV2006-2	New commercial building within existing development
KFC/Taco Bell	DEV2008-3	New commercial building
L'Auberge de Sedona Redevelopment	ZC2008-3	Lodging expansion with the addition of new buildings.
Natural Grocers	DEV2011-1	New commercial building

The City of Sedona replaced all of the legal non-conforming ball fields light fixtures at the Sedona Posse Grounds Park with fully shielded light fixtures on February 1, 2011.

The City is currently replacing all legal non-conforming exterior light fixtures at the City Hall complex. The project is approximately 80% complete and anticipated to finish in November, 2013.

Below are pictures of the Natural Grocers development. This building was built less than two years ago under the Sedona Outdoor Lighting Ordinance.

Below are pictures of the lights at the KFC/Taco Bell. These buildings were built about four years ago under the Sedona Outdoor Lighting Ordinance. Please note that only bollards are used in the parking areas, there are no pole lights. Only recessed cans under eaves are used on the building, and no wall packs or sconces are used.

IX. Community Dark Sky Awareness Events

IDA Requirement:

D) Community commitment to dark skies and education as shown by at least one of the following:

- i) Planning and execution of at least two community dark sky awareness events per year. This may be organized through a local astronomy club, municipality, school, etc. AND/OR;**

Sedona:

Content:

As part of its own commitment to dark skies, KSB has been working with other community organizations to organize and implement a series of related events. As the following list outlines, we have participated in one event and have three more in the immediate pipeline.

- a. Sedona National Night Out, August 6, 2013
 - i. Letter from the City of Sedona Police Chief
- b. Star Party, Red Rock State Park, November 9, 2013
 - i. Kudos Newspaper Article – Kudos is the most important and most widely distributed (every postal address) weekly cultural-events publication in the greater Sedona/Verde Valley region.
 - ii. Activities Schedule Red Rock State Park
- c. Keep Sedona Beautiful Speaker Series, November 13, 2013
 - i. Kudos Newspaper Article

Sedona National Night Out

August 6, 2013

Sedona's National Night Out was a celebration hosted by the Sedona Police Department at the Posse Grounds Park in Sedona. There was participation from public service agencies and private organizations. Keep Sedona Beautiful Dark-Sky Committee participated in this event by having an exhibit table. We talked with residents about the Dark-Sky Community designation, light pollution, and preserving the night sky. National Night Out is designed to increase community involvement and strengthen partnerships between the community and local public safety agencies.

Refreshments were served.

- i. Letter from the City of Sedona Police Chief

SEDONA POLICE DEPARTMENT

100 Roadrunner Drive, Sedona, AZ 86336

Joann Kondrick
Keep Sedona Beautiful
120 Highland Dr. North
Sedona, AZ 86351

Dear Joann Kondrick,

Sedona's National Night Out event held on Tuesday, August 6, at the Posse Grounds Park was once again successful in spite of the weather conditions. Much of the credit for that success goes to the agencies, organizations and businesses that participated in the program.

The Sedona Police Department, Police Volunteers and I very much appreciate Keep Sedona Beautiful's contribution to this year's event and hope you will plan to join us again next year.

Thanks again for being part of the 2013 event.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Cota".

Raymond Cota
Chief of Police

**Star Party at Red Rock State Park
November 9, 2013**

Keep Sedona Beautiful and Astronomers of Verde Valley (AVV) offer a Star Party for the public on November 9, 2013, at the Red Rock State Park. This Star Party is a great opportunity for families to spend an evening sky together exploring the night sky and to learn about preserving our dark sky. J.D. Maddy, president of AVV, will give an astronomy presentation. Following the presentation, there will be viewing of the wonders of the heaven through telescopes.

There will be craft projects available for the children as well as refreshments.

Article in Kudos Newspaper:

11/4/2013 3:29:00 PM

Goodnight Summer Sky

Final Star Party of the season at Red Rock State Park

Goodnight Summer Sky

Final Star Party of the season at Red Rock State Park

Red Rock State Park will be hosting our final Star Party of 2013 on Nov. 9 at 7:15 p.m. In collaboration with Astronomers of the Verde Valley and Keep Sedona Beautiful, Inc., our theme for the final star party will be "Goodnight Summer Sky."

Star Parties are a great way for families to enjoy the evening sky together, there will even be a chance for children to shake hands with a surprise guest—perhaps one from another world?

Keep Sedona Beautiful, Inc. is a local organization dedicated to preserving the beauty of Sedona. They are currently in the process of securing the Dark Sky Community designation for Sedona. Red Rock State Park is excited to partner with KSB to help meet some of the requirements in order to receive this title and help protect the beauty of our city. "Keep Sedona Beautiful is excited to be a partner in sponsoring this fun and interesting star party. Once you look through one of the telescopes you may want to make astronomy your new hobby. Come and enjoy the beauty of our Sedona night sky!"

The evening begins at 7:15pm with a presentation that will last approximately 45 minutes given by JD Maddy, president of the Astronomers of the Verde Valley. Topics of discussion include current astronomical events such as the comet ISON, Nova Delphini, Meteor Showers, as well as the winter constellations.

Following the presentation there

From left, Keith Ayoite (Park Manager), Allen-Eric Bozonas (Assistant Park Manager), J.D. Maddy (Astronomers of Verde Valley), and Bergit Loewenstein (Keep Sedona Beautiful)

will be telescope viewing available from 8 to 10 p.m. Neptune and Uranus will be visible, as well as the clusters of Perseus, Auriga, Cassiopeia, Pleiades, and a seven day old moon.

Several planetary nebulas, or exploded stars, may also be seen.

There will also be a craft project available for children during the presentation as well as snacks, and warm drinks. Please bring bottled water and a folding chair for your own comfort and dress appro-

priately for cool weather. If you would like to bring a flashlight, please cover the end with red cellophane to minimize light interference on the viewing scopes.

This program will require a \$5 reservation fee per person prior to the event; children 14 and under are free. The \$10 entrance fee will also be applied upon arrival. Parking is limited for this event, so please call early to make a reservation (928) 282-6907.

News release from Red Rock State Park, November 2013

- **ACTIVITIES SCHEDULE**
- **RED ROCK STATE PARK**
- **November 2013**

- Contact: Halley Bagley/ Park Ranger
 - hbagley@azstateparks.gov
 - **Reservations / Inquiries:**
 - **928-282-6907**

- **November at Red Rock State Park features a Navajo speaker, a monthly-guided geology walk, daily-guided tours, birding, and star parties.**
-
- Red Rock State Park is located at 4050 Lower Red Rock Loop Road. Our lecture series this month will feature Evangeline Parsons-Yazzie Ed.D. speaking about the forced migration of the Navajo people. Parsons-Yazzie is a local author and teacher. We will also be hosting a Star Party and presentation with the Astronomers of the Verde Valley and also offer twice-weekly bird hikes, and daily nature walks with knowledgeable naturalist.

- **Lecture Series, *The Long Walk of the Navajo People***
- **by *Evangeline Parsons-Yazzie Ed.D.***
- Evangeline Parsons-Yazzie will present the November Lecture Series Program on Sunday, November 24th, 2013. Evangeline is a professor at the University of Northern Arizona and is also an author published by Salina Bookshelf, Inc. Her work includes Navajo language books for both adults and children. She will be releasing a new book in January.
-
- Evangeline will be speaking about the migration of the Navajo people from 1864-1868. The Long Walk, also known as *Hweeldi* by the Navajo people, refers to the event where the Navajo people were forced to walk over 450 miles to Fort Sumner, New Mexico. The Navajo version of this unfortunate event has mostly remained an oral history for the Navajo people; Evangeline will discuss her ancestors experience during those times.
-
- Evangeline Parsons-Yazzie's father taught her about their Navajo ancestry including culture, language and history. A vital lesson her father shared with her about learning the Navajo language was to "speak from the heart." which became inspiration for her first novel, a historical romance in the time of war.
- Prior to Evangeline's historical romance, she wrote several Navajo language books including

Star Party, November 9th 7:15PM:

Red Rock State Park will be hosting our final Star Party of 2013 on November 9th at 7:15 pm. In collaboration with Astronomers of the Verde Valley and Keep Sedona Beautiful, our theme for the final star party will be “ *Goodnight Summer Sky* “. Star Parties are a great way for families to enjoy the evening sky together, there will even be a chance for children to shake hands with a surprise guest- --perhaps one from another world?

The evening begins at 7:15pm with a presentation that will last approximately 45 minutes given by JD Maddy, president of the Astronomers of the Verde Valley. Topics of discussion include current astronomical events such as the comet ISON, Nova Delphini, Meteor Showers, as well as the winter constellations.

Following the presentation there will be telescope viewing available from 8:00pm to 10:00pm. Neptune and Uranus will be visible; as well as the clusters of Perseus, Auriga, Cassiopeia, Pleiades, and a seven day old moon. Several planetary nebulas, or exploded stars, may also be seen.

There will also be a craft project available for children during the presentation as well as snacks, and warm drinks. Please bring bottled water and a folding chair for your own comfort and dress appropriately for cool weather. If you would like to bring a flashlight, please cover the end with red cellophane to minimize light interference on the viewing scopes.

This program will require a \$5.00 reservation fee per person prior to the event; children 14 and under are free. The \$10.00 entrance fee will also be applied upon arrival. Parking is limited for this event, so please call early to make a reservation 928-282-6907.

Wednesday and Saturday Bird Walks, 8:00 AM: Bird walks begin at 8:00 AM on Wednesday and Saturday mornings. Bird enthusiasts join a naturalist for a guided walk appropriate for beginner and advanced birders. Bring your own binoculars; only a limited number are available for loan from the park. The Hummingbird Patio is an excellent spot to start your tour. Another good viewing point is the visitor center roof. Most year-round birds are found in the riparian area next to Oak Creek or along the field behind the visitor center. The Audubon Society has designated Red Rock State Park as an Important Birding Area (IBA) because of the many species that live or visit here. **Geology Walk November 10th, 2:00 PM**

- Red Rock State Park is located at the base of the Mogollon Rim, the southern edge of the Colorado Plateau. The escarpment is over 200 miles long and ranges in elevation from 2,000 to 3,000 feet. Over millions of years of erosion the rim has receded over four miles leaving behind the picturesque features of Sedona.
- Our monthly-guided geology walk will be held on November 10th at 2:00PM. Join our knowledgeable volunteers as they venture out on our trails and discuss how Sedona transformed into what we see today. This is an interpretive experience for both the beginner and experienced hiker, lasting between 2-2 ½ hours and an elevation gain of 250 feet. **Please bring water and wear suitable footwear.**

•

• **Daily Guided Nature Walks and Activities, 10:00 AM and 2:00 PM:**

- At 10:00 AM everyday, a volunteer naturalist leads a guided nature walk informing visitors about the different life zones of Red Rock State Park. The subjects discussed on this walk include geology, wildlife, history, archeology, and plant life. The naturalists welcome questions during the walk, enhancing the learning experience.
- During the afternoon, the park hosts a 45-minute ranger/naturalist-led walk, various presentations depending on the season and nature videos.

•

• **Picnic Areas and Shelters:**

- Several covered ramadas and picnic tables are available to reserve throughout the park. The ramadas feature charcoal barbecue grills, picnic tables, electrical outlets, water and nearby restrooms. To inquire about reserving a ramada for groups, please call **928-282-6907**. These areas are also available for daily visitors.
- Red Rock State Park is a “*pack in-pack out*” facility and does not provide trash receptacles. Please remember to “*pack out*” your trash with you to help us protect the environment and wildlife.

•

• **Hike on Your Own!**

- The family-oriented trail system is well marked for safety and enjoyment if you prefer to explore on your own. Five miles of trails have interconnecting loops leading to red rock vistas or along the lush greenery of Oak Creek. The three major loops are connected along the riparian corridor by the **Kisva Trail**, which also leads to the short loop of the **Yavapai Ridge Trail**. The **Javelina Trail** takes you into the pinion/juniper woodlands and back to the other loops.

Detailed information is available at the Visitor Center. Bikes and horses are allowed on designated routes, which are limited.

-
- **Junior Rangers:** A Junior Ranger program is available for children between the ages of six and twelve. Junior Rangers pledge their part in helping preserve the beauty of the park for everyone! Junior Ranger booklets, available at the Visitor Center, have activities to complete and, once approved by a Ranger, the newest Junior Ranger at Red Rock State Park is sworn in after taking the pledge and receiving a Junior Ranger button.
-
- **Visitor Center and Theatre:** The Park Visitor Center features many displays about the area's geology, archaeology, flora and fauna, including an interactive relief map of Sedona and computer programs about various park features, such as the House of Apache Fires. The popular video, "*The Natural Wonders of Sedona*", narrated by local voice-over artist John Conway, is shown several times daily in the Park Theatre. The video features aerial explorations of ancient Indian ruins and dramatic landscapes, colorful desert wildflowers, and local wildlife.
-
- Join us here at Red Rock this November or any time of year for your next adventure! Whether you're attending a planned event or hiking on your own, you'll enjoy our trails and facilities, making for a great day with the family or a bit of solitude for yourself.
-
- ---

Red Rock State Park, 4050 Lower Red Rock Loop Road, Sedona. Park hours are 8:00 AM to 5:00 PM; Visitor Center, 9:00 AM to 4:30 PM. Entrance fee is \$10.00 per vehicle, up to four adults. The Arizona State Park Annual Pass is available for \$75.00 (some restrictions apply). www.azstateparks.com, www.benefactorsrrsp.org, www.azstateparks.com/parks/RERO

**Keep Sedona Beautiful (KSB) Speaker Series
November 13, 2013**

KSB has a popular Speaker Series program of monthly presentations by invited speakers. On November 13, Dennis Young, an internationally known astronomer and photographer, and Sedona resident for the past 28 years, will speak about Astro-Scenic Photography of Sedona and Arizona Landscape. He will present his photographs of Comets, Fireballs, Northern Lights, and more that have graced the dark sky of Sedona in years past.

c. i.

Keep Sedona Beautiful presents program on Astro-Scenic Photography

"Astro-Scenic Photography" will be the topic at Keep Sedona Beautiful, Inc.'s Preserving the Wonder™ Speaker Series on Wednesday, Nov. 13.

The evening will begin at 5:30 p.m. with complimentary offerings of appetizers donated by El Rincon Restaurante Mexicano and refreshments provided by KSB. The presentation will begin at 5:45 p.m.

Come join Keep Sedona Beautiful ("KSB") and feast your eyes on Dennis Young's brilliant photographs of the starry night skies of Sedona and other choice places framing the beautiful desert skies of Arizona.

The presentation will feature photographs of comets, fireballs, northern lights and more. As is true for all cities, population growth and technological progress, especially in lighting, have taken a toll on the natural dark skies of Sedona. KSB is partnering with Dennis and others in pursuing a Dark-Sky Community designation from the

International Dark-Sky Association (IDA) for the City of Sedona.

Internationally known astronomer and photographer Dennis Young has been a Sedona resident for 28 years. President of Sirius Lookers, a Sedona-based astronomy club, he leads astronomy programs at local schools, colleges, resorts, state and national parks.

"I started in Detroit but the sky didn't beckon like it does in Sedona," he says. "You can see galaxies with the naked eye here," he says. "It's always changing. A galaxy you've seen before now has a supernova. You can look at a different object each night for the rest of your life and never see the same one."

Keep Sedona Beautiful welcomes the community and visitors alike to its monthly Preserving the Wonder™ Speaker Series, which takes place at its historic Pushmataha Center on 360 Brewer Road in Sedona. Please note that the Speaker Series is now held the second Wednesday each month

The KSB presentation will feature photographs of comets, fireballs, northern lights and more. As is true for all cities, population growth and technological progress, especially in lighting, have taken a toll on the natural dark skies of Sedona.

from September to June, beginning at 5:30 pm with refreshments.

Star Party at Sedona Posse Grounds

November 22, 2013

Keep Sedona Beautiful and Astronomers of Verde Valley (AVV) offer another Star Party on November 22, 2013, at the Posse Grounds in Sedona. The Comet ISON is the big event for this star party, as well as the public learning about preserving the night sky. J.D. Maddy, president of AVV, will give an astronomy presentation, which is to include photos of Comet ISON. After the presentation, telescopes will be available for an evening of viewing. Refreshments will be served.

A Night Under the Stars

By *Sedona.biz Staff*

KEEP SEDONA BEAUTIFUL
PRESERVING THE WONDER SINCE 1972

Sedona AZ (November 15, 2013) – Come experience the wonders of Sedona’s night sky. Keep Sedona Beautiful (KSB) and The Astronomers of Verde Valley (AVV) will host a “Night Under the Stars” on Nov 22, 7-10 pm at the Recreation Center, Posse Grounds Park, Sedona.

The public is invited to enjoy the display of stars through telescopes provided by AVV. The evening will start off with a brief discussion of the importance of protecting dark skies by preventing light pollution. To this end, Sedona and the surrounding areas have lighting ordinances that will help keep their skies dark for everyone in the future.

J.D. Maddy, President of The Verde Valley Astronomers, explaining lunar eclipse.

Photo Credit:: Susan L. Amon

In a slide presentation of photos taken mostly by local astrophotographers, J.D. Maddy, president of the AVV, will talk about some basics of astronomy, exciting past and current events in our area's night sky, and what you will be seeing through the various powerful telescopes set up for viewing. Comet ISON, its brightest appearance eagerly anticipated in late November and early December, will be a hot topic. The telescopes will show off star clusters, globular clusters, nebulae, planets, colorful double stars; even Neptune and Uranus will be visible and a few galaxies can be seen in Sedona's dark sky. Throughout the year, AVV hosts people from all over the USA and the World to show them the starry sky of Sedona and the surrounding areas. KSB is pursuing a Dark-Sky Community designation for Sedona by the International Dark-Sky Association.

A Night Under the Stars – Nov. 22, 7 – 10 pm, Recreation Center Posse Grounds Park, 525 Posse Ground Rd, Sedona. The event is free. Wear warm clothes. Hot drinks and snacks will be available. Flashlights must be covered by red cellophane. For further information on the event email ksbsedonadarkskies@icloud.com and for information on KSB please call 928.282.4938, or visit

Sedona, AZ 86336

Dear Joanne:

I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

Sincerely,

Jeffrey Hall

Director

Lowell Observatory

Joanne Kendrick
Chair, Dark Skies Committee
KSB
360 Brewer Rd.
Sedona, AZ 86336

Dear Joanne,

We wish to express our strong support to have the City of Sedona designated as a Dark Sky Community. The night sky in Sedona is still clear and beautiful (depending upon weather of course). The City has complied with their own guidelines of using lighting only where it is needed for safety while minimizing impact on the night sky. The recent debate about installing lighting along Hwy 89A is over; and we see now that the lighting selected by ADOT is well-focused on the roadway itself with minimal impact upon the night sky.

We would take much pride in being designated a Dark Sky Community!

Thank you,

Norm and Jane Hanson
75 Cimarron Ridge Dr.
Sedona, AZ 86336

Chair, Dark-Skies Committee
Keep Sedona Beautiful
360 Brewer Road
Sedona, AZ 86336

Dear Joanne:

I endorse the efforts of Keep Sedona Beautiful to have the City of Sedona designated as a Dark-Sky Community by the International Dark-Sky Association.

Sedona is recognized worldwide as one of the most unique and picturesque locations in the United States. Sedona is a place where the Milky Way is not only visible but is also a bright presence. The spectacular views of the heavens are enjoyed by both residents and visitors. It is important for this community that this increasingly rare resource be protected.

Sincerely,

Dear Georgia:

I just learned about your effort with Keep Sedona Beautiful to secure dark sky designation. Feel free to add my name if it is helpful. My visit to Sedona was magnificent, and as growth occurs, it will be even more important to retain a dark night sky. Thanks for all your efforts in this regard!

All the best,
Stephanie

VI. City-Owned Lighting Confirming with the Light Code

IDA Requirement:

B) Community commitment to dark skies and quality lighting as shown by:

- i) **City-owned lighting conforming with, or committed to conforming with, the lighting code (if the latter, a published plan with a timeline for completion in no more than 5 years).**

Sedona:

For clarity of presentation, we have divided the City's compliance program into the following sections.

Content:

a. City Hall

Content:**a. City Hall**

As part of its dark skies compliance program, the City has embarked on the following:

As part of the fiscal year 2012/2013 budget, Sedona City Council approved funds to begin retrofitting all City Hall lighting fixtures with energy efficient, dark sky compliant lighting. Sedona City Hall has a total of 133 outdoor lighting fixtures. From July 1, 2012 through June 30, 2013, 90 fixtures and/or bulbs were retrofitted to meet the City of Sedona's dark sky outdoor lighting ordinance.

As part of the fiscal year 2013/2014 budget, Sedona City Council again approved funds to retrofit the remaining outdoor lighting fixtures to bring Sedona City Hall into complete compliance with the City of Sedona's dark sky outdoor lighting ordinance. Sedona's facility maintenance staff will have the remaining outdoor fixtures and bulbs replaced by December 2013.

The following table summarizes all outdoor lighting fixtures located at Sedona City Hall. This chart indicates the total cost to retrofit all outdoor lighting fixtures, the total overall anticipated energy reduction, the total overall lumens count, and those outstanding fixtures that are scheduled for replacement between July 2013 and October 2013.

Type of Fixture	#	Old Wattage	New Wattage	Cost (ea)	Total	Lumens (ea)	Total Lumens	# still to be installed
Bollard	26	70	30	\$672.25	\$17,478.50	1500	39000	3
Wall pack (20 watt)	21	22	20	\$161.25	\$3,386.25	1323	27783	0
Wall pack (10 watt)	5	22	10	\$142.00	\$710.00	719	3595	0
Step lighting	37	9	5	\$133.53	\$4,940.61	128	4736	22
Covered Parking bulbs	24	40	28	\$13.50	\$324.00	2562	61488	12
Recessed lighting	14	15	9	\$38.48	\$538.72	620	8680	0
PD Wall packs	1	90	40	\$357.06	\$357.06	3200	3200	1
PD other lighting	1	90	40	\$318.79	\$318.79	3200	3200	1
Other Parking lighting	4	250	100	\$126.40	\$505.60	8000	32000	4
	133						183682	43

Total Cost: **\$28,559.53**
Energy Use Reduction: **46.5%**

City Manager's Office

Memo

Date: November 14, 2013
To: Joanne Kendrick
From: Nicholas R. Gioello
Assistant to the City Manager
Subject: Retrofit of City Hall complex exterior lighting fixtures

The retrofit of all City Hall complex exterior lighting fixtures to fully-shielded dark sky compliant fixtures is now complete; all exterior light fixtures are fully shielded. City staff is currently in the process of replacing the four 250 watt high-pressure sodium parking lot lights with 100-watt induction lighting elements. This process will be 100% complete by the end of December 2013.

WHAT'S DIFFERENT ABOUT THE LIGHTING AT CITY HALL?

Lots! David DeMerritt, City of Sedona Facilities Supervisor, has been up on his ladder changing out every fixture with lower cost, longer lasting lights.

From the bollards to the wall lights, from the step lights to the recessed lights, LED lighting was selected for these applications due to its longevity and quality of light. LED bulbs are almost maintenance free and it will be 10 years before David will need to change them out. They lower the City's electrical costs and improve night-time safety.

For example, the cost to operate one bollard in the courtyard went from 14 cents per day or \$51 per year to 6 cents per day or \$22 per year.

Before the change-out, the cost to operate exterior lights was \$9.70 per day or \$3,540 per year. After the change-out, the cost dropped to \$5.13 per day or \$1,872 per year.

The parking lot poles and the Police Department garage were both retrofitted with induction lighting. Induction lighting is essentially fluorescent lighting without the filament. Gas in the tube is energized by a high-frequency magnetic field. Because they don't use the filament to energize the gas they can be expected to last more than 60,000 hours. The fixtures under the parking canopy remained as fluorescent tubes but were upgraded with electronic ballasts and lower wattage bulbs. Every fixture installed uses less energy than the one it replaced.

After David completed his research, ordered the bulbs and converted all of the fixtures, we asked him what his favorite part of the project was. He replied, "Turning on the lights and having every fixture work at the same time."

**SEDONA CITY HALL
LIGHT CHANGES:**

TYPE	#	OLD WATTS	NEW WATTS	OLD TOTAL	NEW TOTAL	LUMENS (EA)	TOTAL LUMENS
BOLLARD	28	70	30	1960	840	1500	42000
WALL	26	22	20	572	520	1323	34398
STEP	37	9	5	333	185	128	4736
PARKING POLE	4	250	100	1000	400	8000	32000
TOTAL				3865	1945		113134

SEDONA CITY HALL LIGHT CHANGES:

Below are some before and after pictures for the Wall, Step, and Bollard lights. The Parking Pole fixture remains the same, just retrofitting the bulb from a 250-watt high-pressure sodium to a 100-watt induction. Parking canopy fixtures were also retrofitted from 40 watt fluorescent to 28 watt fluorescent, also using the same fixture.
