

DarkSky Approved Marine Ports Lighting Program

Fee Schedule 2025-08.11

Phase 1 cost: \$2,500 per design review

Covers sites with up to four contiguous work zones. Applications with more than four contiguous work zones will pay \$500 per additional work zone. Failed designs can be submitted three times, after which the applicant will be required to restart the process and pay another \$2,500 application fee.

Phase 1 summary

DarkSky reviews a facility's proposed lighting design against established program guidelines. Designs meeting the program guidelines will be issued a DarkSky approval letter. Designs may be submitted three times for review, after which applicants are required to restart the process.

Phase 2 cost: \$4,000

Covers sites with up to four contiguous work zones. Applications with more than four contiguous work zones will pay a customized inspection fee based on project size. DarkSky requires reimbursement for travel expenses to site locations to undertake field verifications. These costs will be discussed with applicants in advance.

If the design fails field verification, a Phase 2 application must be re-submitted with a second submittal fee of \$4,000.

A secure link will be provided to initiate payment for Phase 2.
